SEE OTHER PRECAUTIONS ON THE BACK PANEL

CAUTION

Never spray directly on plastics. Avoid contamination of feed and foodstuff. Avoid prolonged or repeated inhalation of aerosol mist. Do not store at temperatures over 130°F. Do not puncture can or throw it into fire.

WARNING:

Contents under pressure

Do not remain in treated areas and ventilate the area after treatment is completed.

DIRECTIONS FOR USE

For best results, close up the space to be treated and leave it closed for at least ten minutes after treatment. Release three feet from any surface, holding the dispenser above the head. Moving the dispenser about while spraying aids in dispersion. Dispense only for time indicated.

USE SPARINGLY. Seven seconds of spraying is ample for each 1,000 cubic feet (10'x10'x10'). Not necessary to spray directly on insects but merely release in the air since the aerosol will disperse throughout the enclosed space. Temporarily effective in sheltered outdoor area.
