

# CLEAR TREET

## CONCENTRATE

CLEAR TREET is a specially formulated algaecide for use in home and public swimming pools for the correction and prevention of algae.

### COMPOSITION

	Percent by weight
Active ingredient	60.0 percent
Poly[oxyethylene(dimethyliminio)ethylene(dimethyliminio)-ethylene dichloride]	60.0 percent
Inert ingredient	40.0 percent

### APPLICATION

For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using CLEAR TREET.

For pools having just visible algae growth add an initial dose of 11 oz. to 17 fl. oz. of CLEAR TREET per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 6 to 11 fl. oz. of CLEAR TREET per 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 2 to 4 fl. oz. of CLEAR TREET per 10,000 gals. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of CLEAR TREET throughout the water in the pool is necessary for maximum effectiveness.

CLEAR TREET is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. CLEAR TREET can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. DO NOT mix CLEAR TREET with concentrated dry or liquid chlorine products.

### CAUTION

HARMFUL if swallowed. Avoid contact with skin and eyes. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Use only as directed.
