**DIRECTIONS FOR USE
 TO KILL TICKS AND FLEAS:**

Swab or sponge entire coat of dog with Douglas Tick and Flea Emulsion until thoroughly wet. Allow dog to dry in a warm place without rinsing or toweling. Applications at intervals of once each week will control ticks and fleas on dogs. Repeat application as required, but not more than once a week. If desired, dog may be washed between applications.

CAUTION:

Do not use on nursing pups. Not for human use. Wash hands after use. Avoid contamination of food. Harmful if swallowed.

CAUTION;

Do not use, pour, or spill near open flame or heat. Dispose of container in a safe place. Do not reuse container.
