

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER

Corrosive. Causes severe eye damage and skin irritation. Do not get in eyes, on skin or in clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge treated effluent into lakes, streams or ponds.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

When ALGAE-GON is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium* *insolens* (black algae), *Phormidium* *retzii* (Square D algae), *Lyngbya* *varicosa* (blue-green) and other swimming pool algae. NOTE: Kill refers to initial damage and prevent refers to maintenance dosage.

ALGAE-GON is compatible with most commonly used swimming pool chemicals but should not be mixed with soap or other cleansers or pre-mixed with other water treating chemicals. ALGAE-GON works best when added by itself directly to pool water. ALGAE-GON at use dilution is noncorrosive to inanimate surfaces.

DIRECTION FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

INITIAL DOSAGE: One gallon ALGAE-GON to 50,000 gallons of water.

MAINTENANCE DOSE: One quart ALGAE-GON to 50,000 gallons of water.

Initial dose is used when filling pool at beginning of swimming pool season. If pool has visible growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free from visible algae, use the recommended maintenance dose. Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If makeup water is added at the rate of more than 1% per week of pool capacity, add one quart ALGAE-GON for each 10,000 gallons of fresh makeup water per week.

When the swimming pool season is over, add one gallon of ALGAE-GON to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.
