

SELECT-KIL

READ ENTIRE LABEL BEFORE USING THIS PRODUCT

SELECT KIL is useful for selective post emergent weed control, particularly for grassy weeds. Its activity is enhanced by addition of a suitable surfactant to the spray solution. It is most effective on young, actively growing weeds at air temperatures above 70°F. Its phytotoxic properties are quickly inactivated on contact with the soil.

MIXING INSTRUCTIONS: SELECT KIL must be thoroughly dissolved. Fill the spray equipment reservoir about half full with water and add the required amount of herbicide and surfactant with agitation. Finish filling the reservoir with water and apply. After use, clean equipment thoroughly by flushing with water. Do not store spray solution in tank for a prolonged period.

DIRECTIONS FOR USE

LAWN AND ORNAMENTAL TURF: SELECT KIL is useful for the control of Dallisgrass, sandbur, bahiagrass, nutsedge, barnyard grass, chickweed and wood sorrel with little or no injury to good lawn grasses. On new lawns, do not treat until after three mowings. Good grasses may be temporarily discolored. Zoysia, bluegrass, and bermuda are quite tolerant. Do not use on St. Augustine, centipede or carpet grasses. Mow lawns 1 to 1½ inches high before treatment. Mix 2 fluid ounces (4 tablespoons) of SELECT KIL and ½ fluid ounce (1 tablespoon) of a suitable surfactant in 5 gallons of water and apply to an area of 1000 square feet. Spray thoroughly to wet all undesirable plants. Repeat applications 10 to 14 days apart, may be needed for good control.

HIGH CONCENTRATION HERBICIDE

MSMA LIQUID FOR POST-EMERGENT WEED CONTROL

ACTIVE INGREDIENT:	
Monosodium Acid Methanearsonate*	34.8%
INERT INGREDIENTS	65.2%
Total	100.0%

*Total Arsenic (as elemental) all in water soluble form — 16.1%

Product contains 4.00 lbs. M.S.M.A. per gallon.

CAUTION: KEEP OUT OF THE REACH OF CHILDREN

CAUTION: Harmful if swallowed. Avoid contact with skin. Avoid breathing spray mist. Wash hands after using. Avoid storage near feed or food products. Keep children off treated areas until this material has been washed into the soil. ANTIDOTE: If taken internally, induce vomiting and call a physician at once.

Comments

NON-CROP: SELECT KIL is useful for controlling Johnsongrass, nutsedge, barnyard grass, and certain other weeds on drainage ditch banks, rights-of-way, storage yards, and similar non-crop areas.

Mix SELECT KIL at a rate of 2 to 5 quarts plus 1 to 2 quarts of suitable surfactant in 100 gallons of water. Spray the unwanted vegetation thoroughly to just short of run-off. Any spray equipment that gives good coverage may be used. If regrowth occurs, reapply as required.

DO NOT CONTAMINATE WATERS USED FOR DOMESTIC CONSUMPTION OR BY ANIMALS, WILDLIFE, AND AQUATIC LIFE, OR FOR IRRIGATION PURPOSES.

NOTICE: Use of this material in a manner, or at any time other than in accordance with the directions may produce plant injury, excessive residues, or other undesirable results. Sungro Chemicals, Inc. makes no express or implied warranties other than specified on the label.

CONTAINER DISPOSAL: Do not reuse empty drums. Return to drum conditioner or destroy by perforating or crushing and burying in a safe place away from water supplies. Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard it in a safe place away from water supplies.
