General: Consult Federal, State, or local disposal authorities for approved alternate procedures.

SPACE SPRAY TO KILL FLIES, MOSQUITOES, FLYING MOTHS AND GNATS: Cover or remove exposed food and food handling surfaces. Close room and shut off all air conditioning or ventilating equipment. Apply with mechanical or compressed air sprayer, or with fogger which gives small particle size. Direct spray upwards towards upper corners of room and ceiling. Apply at the rate of 1.0 ounce per 1000 cu. ft. of space to be treated. Leave room closed for one-half hour. **VENTILATE ROOM THOROUGHLY BEFORE RE-ENTRY.** Repeat as necessary for insect control.

CONTACT OR SURFACE SPRAY TO KILL ROACHES, WATERBUGS AND ANTS: Cover or remove food before application as described under space spray. Apply with a sprayer that gives large wetting droplets. Force spray into cracks and crevices in walls and floors, areas at base of machinery, behind cabinets, around pipes and openings, along baseboards and other insect harborage. Use one gallon of spray per 1000 sq. ft. of surface to be treated. For ants, spray trails and all points of entry into building. Spray ant nests directly with a soaking application. In all cases contact as many insects as possible with spray. Repeat applications as necessary for control.

Seller guarantees that this material conforms to the chemical description on the label, and is effective for the purpose claimed when used in accordance with the label instructions. The buyer assumes all risks and responsibility for use and/or handling of this product when such use or handling is not in accordance with label instructions. No other warranty expressed or implied is authorized by seller.
