1500 SPRAYS

METERED

**KILLS FLIES, MOSQUITOS,
GNATS, MOTHS AND
MOST OTHER SMALL
FLYING INSECTS.**

CAUTION:

Keep out of reach of children. Read additional cautions on back panel.

Net weight 6 ounces

Micro-Mist **BUG KILLER**

is especially designed to kill small flying, biting, annoying insects and to act as a repellent as well.

Used in the Micro Mist Automatic Dispenser the special valve is actuated automatically, emitting 100 mg. doses each 15 minutes. Each dose contains millions of tiny particles which float in the air, killing a high proportion of flies, mosquitos, gnats, moths and certain other small flying insects.

Usually, the effectiveness of Micro Mist Bug Killer will be noticeable within one hour after the dispenser is actuated. If less than 24 hour control is required, the dispenser should be set to start one hour before control is desired and run one hour after control is established.

Factors such as air change rate, size and shape of space treated, humidity and temperature affect insect activity and control. One dispenser per 3,000 cubic feet may be considered an average, although in a wind-free area more coverage can be expected. Best results are achieved when good sanitary practices are used. For best results, mount the dispenser as high as possible and in a location where moving air will carry the spray throughout the desired area.

Active Ingredients:

- Pyrethrins .45%
- *Piperonyl Butoxide, Technical* .90%
- N-octyl bicycloheptene dicarboximide 1.50%
- Petroleum Distillate 17.15%

- Inert Ingredients:**
- Propellent 80.00%
 - 100.00%

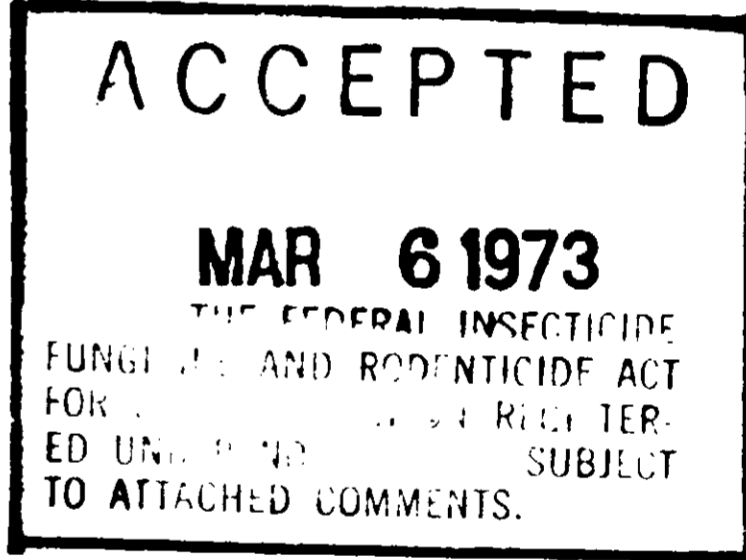

*Consists of .72% (butylcarbityl) (6-propylpiperonyl) ether and .18% other related compound.

WARNING: Contents under pressure. Do not puncture.

Do not use or store near heat or open flame. Exposure to temperatures above 130° F may cause bursting. Never throw container into fire or incinerator. Use 8' or more from exposed food. Do not spray on face or varnished surfaces. Do not use in nurseries or room where infants, ill or aged persons are confined.
