

DIRECTIONS FOR USE

FIRST: Condition your pool with CARE-FREE SWIMMING POOL WATER CONDITIONER AND STABILIZER at the rate of 3 pounds for every 10,000 gallons of water.

THEN: Use CARE-FREE BRAND HIGH POTENCY CHLORINE as directed below to establish and maintain an available chlorine residual of at least 1.0 to 2.0 ppm as determined by the use of a chlorine test kit. It will probably be necessary to repeat the initial dosage (2 oz. per 10,000 gallons) after the pool has been conditioned to satisfy the chlorine demand of the untreated water so as to establish an available chlorine residual of 1.0 to 2.0 ppm. Use enclosed scoop to measure dosage.*

EVERY DAY: After the initial treatment, test the water daily with your chlorine test kit and add CARE-FREE BRAND HIGH POTENCY CHLORINE as required to maintain a residual of 1.0 to 2.0 ppm of available chlorine in the pool water. Heavy usage or high temperature may require more frequent addition of CARE-FREE BRAND HIGH POTENCY CHLORINE to maintain the chlorine residual. Add the daily 2 oz. per 10,000 gallons of CARE-FREE BRAND HIGH POTENCY CHLORINE directly to the pool water. Note: 2 ozs. of this product in 10,000 gallons of water provide 0.94 ppm. of available chlorine.

FOR BEST RESULTS: Maintain the pH of the pool water between 7.2 to 7.6. High pH values can reduce the effectiveness of most chlorine sanitizing agents.

*1 level scoop equals 2 ounces by weight.

WARNING

STRONG OXIDIZING MATERIAL. Contact with organic matter may cause fire or decomposition. Will burn with evolution of chlorine or equally toxic gases. This product may produce chemical burns. Contact with heat, moisture, foreign material, or contamination from any source may result in fire. Keep cover closed when hot in use. Store in a cool dry place.

ANTIDOTE

INTERNAL—Feed gruel or cooked cereal followed by olive oil or cooking oil.
EXTERNAL—Remove excess material and flush skin and eyes with cold water for at least 15 minutes. For eyes get medical attention. Clean contaminated clothing before re-use.

DIRECTIONS FOR USE

TEST. Conduct your pool with CAREFREE SWIMMING POOL WATER CONDITIONER AND STABILIZER at the rate of 3 pounds for every 10,000 gallons of water.
INITIAL. Use CAREFREE BRAND HIGH POTENCY CHLORINE as directed below to establish and maintain an available chlorine residual of 1.0 to 2.0 ppm as determined by the use of a chlorine test kit. It will probably be necessary to meet the initial dosage (2 oz. per 10,000 gal.) after the pool has been conditioned to satisfy the chlorine demand of the untreated water in order to establish an available chlorine residual of 1.0 to 2.0 ppm. Use a scoop to measure chlorine.
EVERY DAY. After the initial treatment, test the water daily with your chlorine test kit and add CAREFREE BRAND HIGH POTENCY CHLORINE as required to maintain a residual of 1.0 to 2.0 ppm of available chlorine in the pool water. Heavy usage or high temperature may require more frequent addition of CAREFREE BRAND HIGH POTENCY CHLORINE to maintain the chlorine residual. Add the daily 2 oz. per 10,000 gallons of CAREFREE BRAND HIGH POTENCY CHLORINE directly to the pool water. Note: 2 ozs. of this product in 10,000 gallons of water provide 0.94 ppm of available chlorine.
FOR BEST RESULTS. Maintain the pH of the pool water between 7.2 to 7.6. High pH values can reduce the effectiveness of most chlorine sanitizing agents.
1 level scoop equals 2 ounces by weight.

WARNING

KEEP AWAY FROM CHILDREN. UNDER THE FEDERAL INSTRUCTIONS FOR FUNGICIDE AND RODENTICIDES FOR ECONOMIC POISON REGULATION UNDER NO. 1141-2

ANTIDOTE

IF SWALLOWED, DO NOT INDUCE VOMITING. Drink plenty of water. If symptoms persist, call a physician. If inhaled, get into fresh air. If on skin, wash with soap and water. If in eyes, flush with cold water for at least 15 minutes. If swallowed, call a physician. Clean and disinfect contaminated clothing before reuse.
