

**ALGAECIDE
CONCENTRATE**

ALGAEWAY

ALGAEWAY

**ALGAECIDE
CONCENTRATE**

APPLICATIONS

Algaeway Concentrate is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using Algaeway Concentrate.

For pools having just visible algae growth add an initial dose of 11 to 17 fl. oz. of Algaeway Concentrate per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 6 to 11 fl. oz. of Algaeway Concentrate per 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 2 to 4 fl. oz. of Algaeway Concentrate per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of Algaeway Concentrate throughout the water in the pool is necessary for maximum effectiveness.

Algaeway Concentrate is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. Algaeway Concentrate can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Algaeway Concentrate with concentrated dry or liquid chlorine products.

ITEM No. 907A

NON-FOAMING

NON-METALLIC

- * **CONTROLS GROWTH OF ALGAE**
- * **EFFECTIVE AT ANY PH.**

ACTIVE INGREDIENT:

Poly Oxyethylene
(dimethyliminio)
ethylene (dimethyliminio)
ethylene dichloride 60 %

INERT INGREDIENT 40 %

NET CONTENTS 32 FL. OZ. (.946 litre)

CAUTION KEEP OUT OF THE REACH OF CHILDREN

USE ONLY AS DIRECTED

ADDITIONAL CAUTIONS ON SIDE PANEL

CAUTION Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 min. If eye irritation persists get medical attention. Avoid contamination of food.
