

Our recommendations for use of the product are based upon tests believed to be reliable. The use of this product being beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such or the results to be obtained, if not used in accordance with directions or established safe practice. The buyer must assume all responsibility, including injury or damage, resulting from its misuse or such, or in combination with other materials.

DANGER: KEEP OUT OF REACH OF CHILDREN

Corrosive. Causes eye damage. Do not get in eyes or on skin. Do not breathe dust. May cause skin, nose and throat irritation. Wear safety goggles, dust respirator and protective clothing when handling. May be fatal if swallowed. May cause burns to broken skin.

FIRST AID: In case of personnel contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes, get medical attention. Clean contaminated clothing before reuse.

If swallowed, feed gruel or cooked cereal followed by olive oil or cooking oil. Call a Physician immediately.

DANGER:

Strong oxidizing agent. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Decomposes at 350-475 F. with liberation of harmful gases. In case of decomposition, if possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

Mix only with water. Do not mix with other pool chemicals. Use only dry clean measuring utensils. Store in a cool dry place. Keep closed when not being used.

Do not reuse container. Rinse empty container thoroughly with water and discard.

This product is toxic to fish. Treated pool effluent water should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Apply this product only as specified on this label.

NEW FIRE RESISTANT SECURE CONCENTRATED POOL CHLORINE

- Features a dry chlorine that dissolves immediately.
- A most effective germicide and algicide.
- Will not cause cloudiness in water.
- Will not add scale forming minerals in the water.
- Will maintain your pool crystal clear.
- Flame resistant.

The control of pH is frequently simplified using SECURE concentrated Pool Chlorine. In fact, you will require from 1/2 to 1/4 times the amount of acid usually applied. SECURE concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and maintains constant strength regardless of storage time. It is economical to use in that, after the pool is stabilized, you will need to apply SECURE concentrated Pool Chlorine less often.

INSTRUCTIONS

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. To accomplish this, add 2 oz. SECURE concentrated Pool Chlorine per 1,000 gallons of pool water. The next morning, add FIXIT cyanuric acid at the rate of 4 oz. per 1,000 gallons to stabilize the pool.

SECURE concentrated Pool Chlorine should be added daily or as needed at the rate of 1/2 or 1/4 oz. per 1,000 gallons of pool water to maintain a chlorine residual at all times of 1.0 ppm to 1.5 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6.
