

## CAUTION

Harmful if swallowed. Avoid contact with skin, eyes and clothing. Concentrate may cause skin damage. Use waterproof gloves and face shield or goggles when handling concentrate. Avoid breathing spray mist. In case of contact, immediately remove clothing and wash thoroughly and get medical attention. For eyes, wash thoroughly with water.

Do not store with or near feed and foodstuffs or drinking water. During application avoid drift to adjacent food and forage plantings that might be damaged or the crops thereof rendered unfit for sale, use or consumption. Do not use treated water for human or animal consumption, swimming, spraying or overhead and furrow irrigation within 10 days after treatment. Do not apply to muddy water and do not agitate water excessively with outboard motor or injection equipment during application. Keep livestock out of treated fields. Wash sprayer immediately after application with detergent and water, then rinse with clean water.

Treatment of aquatic weeds can result in oxygen loss from decomposition of dead weeds. This loss can cause fish suffocation. Therefore treat 1/3 to 1/2 of the water area in a single operation and wait 10 to 14 days between treatments. Begin treatment along the shore and proceed outwards in bands to allow fish to move into untreated areas. Consult your State Fish and Game Agency before applying this product to public waters. Do not apply to muddy water. Check with state authorities for necessary permits.
