Our recommendations for use of this product are based upon tests for safety. We cannot be held responsible for any injury or damage resulting from the use of this product in any manner not intended by the manufacturer. The user must assume all responsibility for any injury or damage resulting from its use as such or in combination with other materials.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

Corrosive. Causes eye damage. May be fatal if swallowed or gets in eyes. Irritates skin. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wear goggles or face shield and protective clothing when handling. Wash hands after handling.

FIRST AID PRACTICAL TREATMENT

If swallowed: Feed small sips of water. Do not induce vomiting. If eye contact: Flush eyes with water for at least 15 minutes. If on skin: Wash with soap and water for at least 15 minutes. If on clothing: Remove and wash contaminated clothing before reuse.

CHEMICAL HAZARDS

Strong oxidizing agent. Do not use moist or damp utensils. In combination with moisture, dust, organic matter, or other chemicals, it may start a fire. May start a chemical reaction with generation of heat, steam, or toxic gases and possible generation of fire.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Keep out of lakes, streams, ponds, or public water. Permits may be required for discharges containing this pest into public waters. For guidance, contact the regional office of the Environmental Protection Agency.

DIRECTIONS FOR USE

GENERAL CLASSIFICATION

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

- 1 Test pool water for pH. Use test kit. Adjust pH to 7.2-7.6 pH can be lowered with Muriatic Acid or DRY ACID. Follow the directions on the labels of these products.
- 2 Superchlorinate and satisfy chlorine demand of pool water by addition of SUPER-TABS at the rate of 20 oz. per 10,000 gallons of water. Do this in the evening for best results. Bathers should not be allowed to enter the pool until the chlorine level has fallen below 3 ppm as determined by a reliable chlorine test kit.
- 3 Next day, add CYANURIC ACID (FIXIT). Follow the directions on the label of this product.
- 4 Tablets are approximately 1/2 oz. each.

DAILY DOSAGE

Add up to 2 ounce of SUPER-TABS per 10,000 gallons of water daily or as needed to maintain a chlorine residual of 1.0-1.5 ppm. Use the test kit daily and make pH and chlorine residual adjustments as required. During hot weather and with heavy bathing loads or after heavy rain, it may be necessary to add additional SUPER-TABS. During these periods, repeat the normal daily dosage to maintain a 1.0-1.5 chlorine residual. Superchlorinate weekly in hot weather with 4 to 10 times the daily dosage of SUPER-TABS. Before entering the pool check the chlorine residual and if above 2.0 ppm allow the pool to stand until the residual drops to 2.0 ppm or less. Add SUPER-TABS through skimmer, floating dispenser or automatic feeder. DO NOT ADD DIRECTLY TO POOL WATER.

NOTE: This product degrades with age. Use a chlorine test kit and chlorine as directed here only to obtain the required level of available chlorine.

STORAGE AND DISPOSAL

Keep in airtight, dry, light-resistant container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Do not use if the container is damaged or if the tablets are broken and found with large amounts of water. Do not use if the container is empty or if the tablets are broken. Dissolve in water before disposal. Place in a leak-proof container and dispose in a sanitary landfill area or bury in a safe place. NEVER MIX SUPER-TABS CONCENTRATED CHLORINATING TABLETS WITH OTHER CHEMICALS OR OTHER TYPES OF CHLORINATORS. DO NOT REUSE CONTAINER.
