

**GONE**  
 For best results, treat shortly before or at the time plant growth begins. Adequate control is possible when the vegetation is short or just after mowing. Thorough watering 24 hours after application will move the material to the root zone and speed up control. The effectiveness and length of time that control will last will depend on type of soil, amount of rain and other conditions.

**NOTE:** Do not apply, allow to drift or drain or flush equipment onto or near croplands, lawns, trees or other desirable plants or to areas where their roots may extend. DO NOT contaminate domestic water supplies. DO NOT allow contact with fertilizers, insecticides, fungicides or seed. Application equipment should be thoroughly cleaned with a detergent and water to prevent corrosion. Equipment which has been used to apply this product should not be used for applying insecticides, fungicides, fertilizers or other agricultural chemicals as plant injury may result. Do not contaminate irrigation or domestic water supplies.

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

See side panel for additional cautions

**CAUTION!**

- HARMFUL IF SWALLOWED
- IRRITATING TO SKIN AND EYES

Do not get on skin, in eyes or on clothing. May irritate nose and throat. In case of contact, immediately wash skin with plenty of water. For eyes, wash with water for at least 15 minutes and get medical attention. Vapors from this product may injure desirable nearby plants.

**EQUIPMENT**

Power sprayers, compressed air hand sprayers, knapsack sprayers or an ordinary sprinkler can be used to apply **GONE**.

**NOTICE**

**KEEP FROM FREEZING.** If this product is stored in cold or freezing weather it may separate or thicken. This will not harm the performance. Before using, warm to room temperature and stir thoroughly.

### DIRECTIONS FOR USE

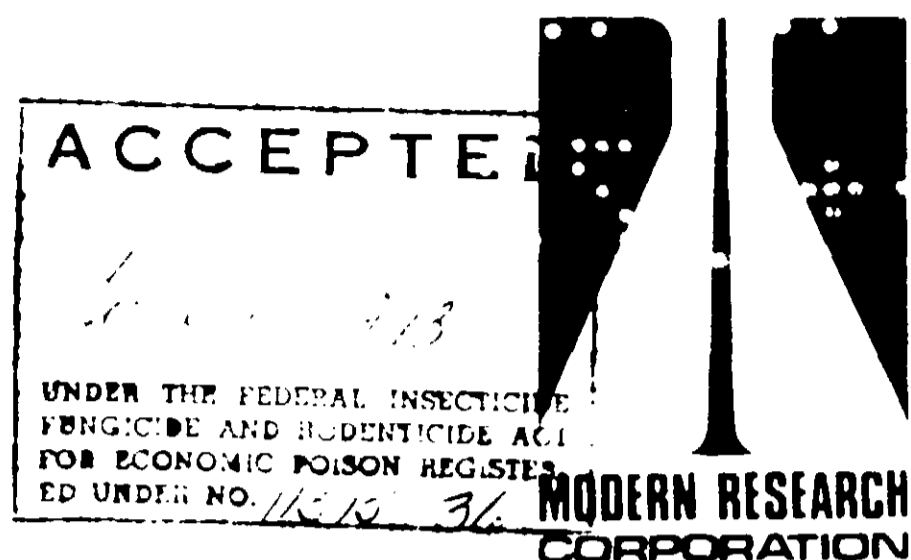

For treating 1000 square feet, under ordinary conditions, dilute 3 to 6 gallons of **GONE** with sufficient water to give good coverage. For application —use a sprayer that will produce a coarse wet spray and that will apply the solution evenly over the entire area. For best results treat shortly before or at the time plant growth begins. Adequate control is possible when the vegetation is short or just after mowing. Thorough watering 24 hours after application will move the material to the root zone and speed up control. The effectiveness and length of time that control will last will depend on type of soil, amount of rain and other conditions.

**NOTE:** Do not apply, allow to drift or drain or flush equipment onto or near croplands, lawns, trees or other desirable plants or to areas where their roots may extend. **DO NOT** contaminate domestic water supplies. **DO NOT** allow contact with fertilizers, insecticides, fungicides or seed. Application equipment should be thoroughly cleaned with a detergent and water to prevent corrosion. Equipment which has been used to apply this product should not be used for applying insecticides, fungicides, fertilizers or other agricultural chemicals as plant injury may result. Do not contaminate irrigation or domestic water supplies.
