

Net Weight 1 Pound

P/P Insecticide No. 2

(For House & Garden)

ACTIVE INGREDIENTS:

*†(5-Benzyl-3-furyl) methyl 2, 2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate	0.250% w/w
Related compounds	0.034%
Aromatic Petroleum hydrocarbons	0.332%

INERT INGREDIENTS: 99.384%

*Cis/trans isomers ratio: max. 30% (+) cis and min. 70% (+) trans.

†U.S. Patent No. 3,465,007

SHAKE BEFORE USING

CAUTION:

KEEP OUT OF REACH OF CHILDREN

Avoid contamination of feed and foodstuffs. Cover or remove fish bowls. Do not use on edible crops. Contents under pressure. Do not puncture. Do not expose container to temperatures above 120°F. Never throw container into fire or incinerator.

SHAKE BEFORE USING

WARNING

Keep out of reach of children. Avoid contamination of feed and foodstuffs. Cover or remove fish bowls. Do not use on edible crops. Contents under pressure. Do not puncture. Do not expose container to temperatures above 120°F. Never throw container into fire or incinerator.

DIRECTIONS

Shake well before each use. Remove protective cap. Aim spray opening away from people. Push button to spray.

INDOORS — FOR HOUSEFLIES, MOSQUITOES, AND GNATS:

Close all doors and windows. Point nozzle upward, direct the spray mist to all parts of the room, especially windows and other light sources which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

WASPS: Application should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places contacting as many insects as possible. Repeat as necessary.

INDOORS — FOR CRAWLING INSECTS:

Roaches, earwigs, grain mites, sowbugs, spiders and centipedes: Spray thoroughly into hiding places such as cracks, crevices, moist areas, opening around pipes and sinks, under refrigerators, baseboards, and storage areas. Spray directly on insects where possible. Repeat as necessary.

ANTS: Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

OUTDOORS — TO KILL FLYING INSECTS:

Control mosquitoes, gnats (midges), houseflies, biting flies and certain flying moths by spraying their resting areas. Follow precautions listed above. Hold container 18 to 24 inches from shrubs, bushes and grassy areas. Spray these areas with a slow sweeping motion at the rate of from 1 to 3 seconds per cubic yard of space while moving away from the treated areas. To reduce annoyance from these flying insects, treat open porches and patios in a similar manner. Spray only when the air is still. Allow spray to dissipate before occupying the treated area. Repeat as necessary.

OUTDOORS — TO PROTECT ORNAMENTAL PLANTS:

Aphids, exposed thrips, adult whiteflies, leafhoppers, plant bugs, spittlebugs, Japanese beetles, and mimosa webworm larvae. Spray directly on insects by holding the container 12 to 18 inches from the infested plants. Spray in short bursts of one to three seconds over one linear foot of plant foliage. Direct spray to all sides, covering foliage until slightly moist. Avoid heavy wetting. Use with caution on the tender foliage of Quince, Juniper cypress, Mulberry, Ash, Cottonaster, Rose, Camellia, Azalea, Pyracantha and Caenothus, as certain varieties have shown some leaf browning with heavier dosages. Repeat applications as necessary.

When infested, spray smaller evergreens, deciduous trees and shrubs as rhododendrons, pines, spruces, hemlock, yews, arborvitae, junipers, holly, podocarpus, boxwood, laurel, lilac, spirea, dogwood, palm, tree mimosa, toyon, viburnum, euonymus, oaks, maples, locust, forsythia, althea for control of aphids and other pests listed above.

Also spray infested flowering plants as peonies, iris, zinnia, snapdragons, ageratums, chrysanthemums, nasturtium, daisy, geraniums, marigolds, daphne, fatshedera, ivy, tobira, queen sago, broad leaf acacia for the same listed pests. Repeat as necessary.

OUTDOORS — TO PROTECT HOUSE PLANTS:

Spray infested African violets, philodendron, geraniums, begonias, coleus for control of listed pests. Repeat application as necessary.

OUTDOORS — TO CONTROL NUISANCE PESTS:

ANTS: Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

ANIMAL PESTS

DOGS, CATS, — Fleas — Apply directly to animals along back, under forelegs and on other areas. Part hair to contact skin and insure good coverage. Hold nozzle about one foot away while spraying. Apply until hair is thoroughly moist. Do not directly spray in eyes, ears, or mouth of animal. To reduce reinfestation, thoroughly spray the animals bedding and other resting areas. Treat these areas at the rate of two seconds per linear foot while spraying at a distance of 12 to 18 inches. Also spray entire inside surface of dog houses. Repeat as necessary.
