PETERSON / PURITAN

SBP-1382®

# YARD AND PATIO FOGGER OUTDOOR FOGGER

### ACTIVE INGREDIENTS:

*†(5-Benzyl-3-furyl) methyl 2, 2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate	0.250% w/w
Related compounds	0.034%

### INERT INGREDIENTS:

99.716%
<hr/>
100.000%

\*Cis/trans isomers ratio: max. 30% (+) cis and min. 70% (+) trans.

†U.S. Patent No. 3,465 007

SHAKE WELL BEFORE USING

### CAUTION:

#### KEEP OUT OF REACH OF CHILDREN

Avoid breathing spray mist. Avoid contact with skin. Harmful if swallowed. Not for indoor use. While spraying for flying insects outdoors, hold container 4 to 6 feet away from plants and shrubs. Direct spray to fill the air around these plants without heavily wetting the plant foliage. Avoid smoking while spraying. Cover food before spraying. Do not spray on food crops. Direct spray away from people or animals. Allow spray to disperse for several minutes before entering the treated area.

### WARNING:

Contents under pressure. Do not puncture. Do not expose container to temperatures above 120°F. Never throw container into fire or incinerator. Do not use or store near heat or open flame.

Manufactured by

PETERSON/PURITAN, INC.

Spray outdoor areas of the yard, patio and camp ground when there is no breeze or spray in the direction of a slight breeze.

Controls flies, mosquitoes and gnats up to 21 feet away, using this fog nozzle.

### DIRECTIONS FOR USE

Shake well before using. Point spray nozzle away from face and in the direction of the space to be treated. Press down valve button and allow spray fog to fill the air where flying pests linger. For larger areas, best results are obtained by spraying in the direction of a slight breeze that allows the fog to drift into the areas of infestation. Spray while moving away from treated areas. Allow spray to dissipate before occupying the treated area. Repeat as necessary.

**FLYING INSECTS** — Reduce annoyance from flies, mosquitoes, moths and gnats by directing spray from a distance of 4 to 6 feet from flowering plants, shrubbery, and grass to where the insects may be resting. Avoid heavy wetting of plant foliage. Also spray around garbage cans and other breeding areas. Repeat as necessary. Spray directly on wasps and hornets. Thoroughly wet the nesting area during the evening when these insects are least active.

**CRAWLING INSECTS** — Spray directly on ants, centipedes, sowbugs, and spiders. Treat areas around garbage cans, picnic sites and camp grounds infested by these pests. Also thoroughly spray ant hills for best results. Spray in short bursts of 2 seconds at a 4 to 6 foot distance for control of *Brown Recluse Spider* and *Black Widow Spider*. Repeat application as necessary.
