DIRECTIONS FOR USE

For outdoor use. Can also be used in attics, warehouses and other storage areas where foods and feedstuffs are not exposed.

For Outdoor Use: Application should be made in late evening when hornets, wasps and yellow jackets are at rest. Hold can upright. Remove cap. Point valve opening away from face. With wind at back, aim at nests in trees, bushes, under leaves, chimneys, cracks or crevices, etc.

For Indoor Use: Point valve opening away from face. Aim directly at nests of hornets, wasps and yellow jackets under rafters, etc. Do not spray in areas where foods and feedstuffs are exposed or handled.

Thoroughly saturate nest with spray, contacting as many insects as possible. To prevent insects from falling on skin and clothes, do not stand directly under nest. Best results can be obtained if nest is sprayed in late evening when most insects are at rest. If reinfestation occurs, repeat treatment.
