EXCLUSIVELY FOR
WEASTRONG CHEMICAL
INDUSTRIAL

The presence of algae in the swimming pool is objectionable because of the color, chloramine color, and increased chlorine demand of the water. The use of Armstrong Algae-Rite will keep the water in a clean condition. Algae-Rite is compatible with the usual water treatment chemicals. By controlling algae growth with Algae-Rite the chlorine demand of the pool may be significantly reduced.

[illegible]

DIRECTIONS

- 1 in the six-sided pond. The algae, however, are not growing in the water and are
2 pulled along the bottom of the pond. The water is green and is growing.
3 If algae grow in a pond, they are not in the water. They are in the water, but
4 they are not in the water. They are in the water, but they are not in the water.
5 If the algae are not in the water, they are not in the water. They are not in the water,
