

Farris Chemical Company, Inc.
P.O. Box 22339
Knoxville, TN 37933

Gentlemen:

Subject: Micro Bio-Control W-30
EPA Registration No. 11529-11
Your Amendment Application of November 15, 1985

The amendment referred to above, submitted in connection with registration under FIFRA, is acceptable provided that you:

1. Make the labeling change listed below before you release the product for shipment bearing the amended labeling:

Revise the label in accordance with the enclosed sample label.

2. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

A. E. Castillo
Product Manager (32)
Disinfectants Branch
Registration Division (TS-767C)

NET CONTENTS _____

DIRECTIONS FOR USE

It is a violation of federal law to use this product in any manner inconsistent with its labeling.

Product is used to control algae, bacteria and fungi in recirculating commercial and industrial water cooling towers, industrial air washers and retort cooling waters in canning plants. Prior to its use, systems must be cleaned to remove algae growth, microbiological slime and other deposits. An initial slug addition of 1.9 to 4.75 fluid ounces of product per 1000 gallons of water to provide a concentration of 30 to 50 parts per million of product, based on the total weight of water in the system, is recommended. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Do not stack more than four drums high. Leaking or damaged drums should be placed in overpack drums for disposal. Spills should be absorbed in sawdust or sand and disposed of in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL:

Plastic: Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, by incineration or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

METAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.
