STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

CAUTION

KEEP OUT OF REACH OF CHILDREN

HARMFUL IF SWALLOWED: Avoid breathing of spray mist. Medical Emergency Telephone Number: 716-266-2283

MILL-O-CIDE SUPER STRENGTH is a combustible mixture and should not be sprayed into or near an open flame. All pilot lights should be off while spraying. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment, or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

EPA EST. 527-IL-1

DIRECTIONS

Area to be sprayed should be thoroughly cleaned by removing accumulations from all cracks, shelves, beams and on and around packages of stored food products. Close doors and windows and keep closed for 10 to 15 minutes after spraying. Do not remain in treated areas. Ventilate the area after treatment is completed. Sweep up and dispose of fallen insects.

Where to Spray — Spray MILL-O-CIDE SUPER STRENGTH into the air in the form of a fine mist or fog. Spray under and around all equipment and racks, into all cracks, crevices and corners, and on floors, walls and ceilings.

When to Spray — MILL-O-CIDE SUPER STRENGTH should be sprayed once or twice a week as a regular procedure and daily in cases of severe infestation.

Not Reviewed. Registrant claims to be in accordance with Reregistration of Pesticide Product Guidance for Phase 2 Response, Page 2.12, Active to Inert Change in Status.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

On Animals:

To protect animals from horn flies, houseflies, mosquitoes, and gnats, apply a light mist sufficient to wet the tips of the hair.

To control stable flies, horseflies, deer flies apply ½ to 1 ounce per adult animal, sufficient to wet the hair but not to soak the hide. Repeat the treatment once or twice daily or at intervals necessary to give continued protection.

To control blood-sucking lice, apply the spray lightly to infested areas, using a stiff brush to get the spray to the base of the hair. Use 1 ounce or less per animal. Repeat every two or three weeks as required.

Barns, Milk Rooms, Dairy Plants:

Cover water, drinking fountains, milk utensils and animal feed before use.

To control flies, mosquitoes and gnats, apply as a fog or mist with Micron-Generation equipment, directing spray toward ceiling and upper corners, until the area is filled with mist, using about ½ to 1 ounce per 1000 cubic feet of space. For best results, close windows and doors before spraying and keep closed for one hour. Vacate area and ventilate before reoccupying. Repeat application if necessary.

ULD®

550 D

DAIRY & LIVESTOCK
FLYING INSECT CONCENTRATE
