Subject: Micro Gen Ant Reactor
EPA Reg. No. 11540-20
Final Printed labeling dtd. 8/26/91
Formulation Amendments pertaining to Confidential
Statements of Formulas (CSFs) dtd. 12/19/91 & 4/13/92.

Dear Mr. Yocum:

The final printed labeling referred to above, submitted in connection with registration under FIFRA is acceptable with the following comment:

At the next label printing, delete the word "revolutionary" from the front panel of the label. This language represents false and/or misleading statements to the purchaser and is not in accordance with 40 CFR 156.10 (5)(viii).

A stamped copy of the label is enclosed for your records.

The formulation amendment associated with the CSF dated 12/19/91 is unacceptable. This formulation is not substantially similar to the formulation currently on file for this product.

The formulation amendment associated with the CSF dated 4/13/92 is acceptable.

Sincerely,

Phil Hutton, PM 18
Insecticide/Rodenticide Branch
Registration Division H7505C

MICRO-GEN ANT REACTOR™ Ant Control Baits

FOR COMMERCIAL, INDUSTRIAL AND RESIDENTIAL USE INCLUDING:

Food Processing Plants, Eating Establishments, Food Marketing-Storage-Distribution, Hospitals, Nursing Homes, Schools, Office Buildings, Apartments, Laundries, Buses, Aircraft, Boats, Museums and Zoos.

Ants are attracted to the bait in Micro-Gen ANT REACTOR Ant Control Baits. The bait food is carried back to the nest to kill the queen and destroy the entire colony.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Break Micro-Gen ANT REACTOR Ant Control Baits apart from the plastic frame before placement.

Place baits by ant trails or close to areas where ants are present, even on food preparation surfaces or next to food. Do not place baits on food preparation surfaces when food is being handled or on utensils that are used for food preparation. Also place adjacent to walls, electrical lines, potted plants, waste receptacles, sensitive electronic equipment, inside drop ceilings and wall voids or anywhere ant problems occur. To apply baits to vertical surfaces use the enclosed stickers.

Do not use residual sprays with or near Micro-Gen ANT REACTOR Ant Control Baits.

Ants will begin to feed - population reduction and less activity can be expected in about a week.

FOR EFFECTIVE CONTROL

Use 3-4 baits for the average size room.

Use 6-8 baits for heavy infestations.

Bait stations are designed to be visually inspected with a flashlight. This allows for monitoring and timely replacement. Replacement is recommended after 3 months or when bait is almost entirely consumed (do not risk loss of control by allowing complete consumption).

Micro-Gen ANT REACTOR Ant Control Baits are packaged in a Child Resistant Container.

STORAGE AND DISPOSAL STATEMENTS

STORAGE: Store in a cool, dry area inaccessible to children.

DISPOSAL: Wrap container and put in trash collection.
