DIRECTIONS FOR U.E.

IMPORTANT: Read these entire Directions and Conditions of Sule, including the Warranty and Limitation of Dammes provision, before using CO-RAL 12 Bulk Dust.

COUNTIONS OF SALE: These Directions for Use reflect the opinion of experts based in tests of iffectiveness, of toxicity to laboratory animals and of residues on or in food and feed under normal conditions of use. However, because of the wide range of conditions under which this product may be used, even though label directions are followed, it is impossible to eliminate all risks associated with its use because of abnormal conditions beyond the control of the seller. Chemisto and the Seller offer, and the Buyer uses, this product subject to the understanding that the Buyer assumes all such risks.

CO-RAL 1% Bulk Dust may be used to fill cattle dust bage or it may be applied directly to cattle, swine, or swine bedding by use of a shaker can or a suitable mechanical dust applicator. When used as recommended, CO-RAL 1% Dust controls horn flies and lice on beet and dairy cattle and lice on swine. CO-RAL 1% Dust will also reduce take the populations on cattle, however, as face flies are able to travel over an orea of several miles, best reduction of face fly populations is achieved when CO-RAL 1% Dust is used on an area-wide basis.

RECOMPENDED APPLICATIONS

ANIMAL	PARASITES	REMARKS
		DUST BAG: Place contents of this package in any
		commercially available dust bag. Suspend bags in
	!	areas frequented by cattle or in gateways or lanes
		through which the animals pass daily for water,
Beef	Horn Flies	feed, or minerals. Bags may also be suspended in
and	Lice	loafing sheds or in front of protected mineral
Dairy	Face Flies	feeders. For lactating dairy cows, bags may be
Cattle		suspended in the exit through which cows leave the
		milking barn. In all cases, the bags should be ad-
		justed so that the bottom of the bag will hang four
		to six inches below the topline of the cattle. For
		reduction of face flies, the bags must be located
	1	so the animals will be forced to use them daily and
	•	hung at a height to insure that the foles of the co
		cattle will be disted.
	•	DIRECT APPLICATION: A service 1 Dust may be applied
	1	by use of a shaker can brity using a initable me
	Hora Elles	chanical dust application. Animals should be there
		consuly dusted using a torone than 2 of 7th level -
