

RESTRICTIONS *black*

Do not treat lactating dairy animals, animals less than 3 months old, sick, convalescent, or stressed livestock.

Do not treat non-lactating dairy animals within 14 days of freshening. If freshening should occur within 14 days after treatment, do not use milk for the balance of the 14-day interval.

Do not treat animals for 10 days before or after shipping or weaning, or after exposure to contagious or infectious diseases.

Do not apply in conjunction with oral drenches or other internal medications, such as phenothiazine, nor with natural or synthetic pyrethroids or their synergists, or with other organic phosphates.

WARNING *white*

May be poisonous if swallowed. Harmful if inhaled or absorbed through the skin. Do not get in eyes or on skin. Wash thoroughly with soap and warm water after handling. Wash contaminated clothing with soap and hot water before re-use.

Do not contaminate feed or food. Keep out of reach of children.

If poisoning occurs, obtain prompt medical aid. Prolonged exposure will result in cholinesterase depression. Atropine, sulfate, is antidotal. 2-PAM is also antidotal and may be administered in conjunction with atropine.

Do not reuse empty container. Destroy container by perforating and bury or discard in a safe place.

WARRANTY AND LIMITATION OF DAMAGES

Chemagro Corporation warrants that this material conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use and Conditions of Sale; subject to the risks referred to therein. Chemagro Corporation makes no other express or implied warranty including any other express or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of Chemagro Corporation is authorized to do so except in writing, with a specific reference to this warranty. Any damages arising from a breach of this warranty shall be limited to direct damages, and shall not include consequential commercial damages such as loss of profits or values, etc.

PATENT LICENSE

The principal active ingredient of this product is patented under U.S. Patent No. 2,748,146 and Canadian Patent No. 523,216 of Chemagro Corporation, Kansas City, Missouri, and the purchase of this product includes a limited license under said patents to use or reformulate the product only in the manner provided by the recommended application on the present label. The purchaser obligates itself to notify Chemagro Corporation of any proposed use or reformulation of such licensed product not provided by said recommended applications, and to obtain Chemagro's approval in writing before making any such use or reformulation of the licensed product.

CO-RAL is a Reg. TM. Reg. U.S. and Canadian Pat. Offs. by Farbenfabriken Bayer A.G., Chemagro Corporation licensee.

STOP - READ THE LABEL BEFORE USE FOR CONTROL OF CATTLE GRUBS

DIRECTIONS FOR USE

IMPORTANT: Read these entire Directions and Conditions of Sale, including the Warranty and Limitation of Damages provision, before using CO-RAL Pour-On.

CONDITIONS OF SALE: These Directions for Use reflect the opinion of experts based on tests of effectiveness, of toxicity to plants and laboratory animals and of residues on or in food and feed under normal conditions of use. However, because of the wide range of conditions under which this product may be used, even though label directions are followed, it is impossible to eliminate all risks associated with its use because of abnormal conditions beyond the control of the seller. Chemagro Corporation and the Seller offer, and the Buyer uses, this product subject to the understanding that the Buyer assumes all such risks.

CO-RAL Pour-On Cattle Insecticide is a ready-to-use preparation that requires no further dilution. A single application placed on the backline of an animal gives highly effective control of cattle grubs. A reduction of lice may also be obtained. If reinfestation of lice occurs, use CO-RAL 25% Wettable Powder Animal Insecticide in accordance with label directions.

AMOUNT TO USE:

Apply CO-RAL Pour-On solution at a rate of 1/2 fluid ounce per 100 pounds of bodyweight. Measure the correct amount to use in relation to the animal's weight.

THIS CONTAINER WILL TREAT:

Weight of Animal (lbs.)	200	300	400	500	600	700	800	900	1000
Number of Animals	128	85	64	51	42	36	32	28	25

HOW TO APPLY:

Pour the correct amount of solution uniformly along the animal's back. The CO-RAL solution may be dipped from any clean bucket or pail.

WHEN TO APPLY FOR GRUB CONTROL:

Treatment of cattle with CO-RAL Pour-On can be made at any time during the grub season; however, most beneficial effects will be achieved by treating early in the grub cycle. Treat as soon as possible after activity of heel fly has ceased and preferably at least 6 weeks prior to expected appearance of grubs in the back. Treatments applied very near to or during the time grubs are appearing in the back will destroy the grubs, but considerable damage to meat and hide will have already occurred.
