

® SENDRAN

Concentrate No. 1

May be fatal if swallowed or inhaled. Do not breathe dust. Wash thoroughly with soap and warm water after handling. Wash contaminated clothing with soap and hot water before reuse.

Do not contaminate feed or food. Keep out of reach of children.

SENDRAN is a cholinesterase inhibitor. If misuse results in accidental poisoning, obtain prompt medical aid.

SYMPTOMS: A sense of "tightness" in the chest. Sweating. Contracted pupils. Stomach pains. Vomiting and diarrhea.

TREATMENT: In case of poisoning call a physician immediately. Have patient lie down and keep quiet. If swallowed, induce vomiting by giving a tablespoonful of salt in a glass of warm water. Administer milk or water freely and again induce vomiting until vomit fluid is clear. If on skin, remove contaminated clothing and wash skin immediately with soap and warm water. If eyes are contaminated, wash with flowing water for at least 15 minutes.

Administer atropine sulfate in large therapeutic doses. Repeat as necessary to the point of tolerance.

SENDRAN inhibits cholinesterase resulting in stimulation of the central nervous system, the parasympathetic nervous system, and the somatic motor nerves. Do not use SENDRAN in the treatment of any disease. If SENDRAN is used in the treatment of any disease, the patient should be given appropriate medical treatment symptomatically.

SENDRAN Concentrate No. 1 is specifically designed for use only in the production of plastic flea dogs and/or cats and should be used only by the experience and the trained person necessary for the production of insecticide. SENDRAN Concentrate No. 1 should not be used in any other types of insecticide formulations.

Information on the physical and chemical properties and toxicity of chlorpyrifos methyl is available in a technical information sheet upon request.

While the active ingredient in the active ingredient in this insecticide has been registered by the Environmental Protection Agency, the responsibility of the manufacturer for the safety of the formulation shall be the responsibility of the manufacturer. The manufacturer shall file with the Environmental Protection Agency, in support of currently effective registration of the formulated product, the data to the Environmental Protection Agency registration of the formulated product.

ACTIVE INGREDIENTS:
Chlorpyrifos methyl 90%
Inert ingredients 10%

This product is not to be used on or around humans, animals, or birds. It is for use only in the production of plastic flea dogs and/or cats.
