-----

One Swipe® is scientifically formulated for maximum effectiveness to the animal: Owners of show horses and race horses will find it invaluable as an aid in preventing nervousness caused by flies, gnats and mosquitoes.

One Swipe® - It is long lasting and has a clean pleasant fragrance.

Before application, brush the coat of the animal to remove dirt and debris. Using a piece of terry cloth about the size of a large wash rag, fold it and moisten with One Swipe®. Apply One Swipe® to animal, rubbing against the grain of the hair. Give particular attention to the shanks, legs and face, being careful not to get the material into the eyes. Then groom with a brush.

Protection can be obtained initially by depositing 1 to 2 oz. of One Swipe® on the animal, depending on the size. Subsequent applications may require less due to build-up of repellency from previous applications. Apply daily or as needed.

The wiping cloth can be kept in a container or plastic bag for reuse.

The amount of One Swipe® necessary for good results will depend on various factors such as weather conditions and severity of insects.

Avoid using excessive amounts on the animal. Do not wet the hide.

#### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Do not allow to freeze. Protect from extreme heat.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Do not reuse empty container. Wrap container in newspapers and put in trash.
