**NOTE:** Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) and (B) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Submit and/or cite all data required for registration of your product under FIFRA sec. 3(c)(2)(B). As you are aware, as part of your response to the Guidance Package for Reregistration of Pesticide Products Containing Fenthion (issued June 30, 1988) you agreed to submit to the Agency additional data which are required of you under the authority of FIFRA Section 3(c)(2)(B). Since the subject product contains the active ingredient fenthion, you are required to submit generic data relevant to the uses of this product and not later than the dates specified in the Fenthion Guidance Package.
3. Make the labeling change listed below before you release the product for shipment:

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL	DATE
---------------------------------	------

TML 1/24/91

- a. Add the phrase, "EPA Registration No. 11556-105."
- b. Revise the Pesticide Disposal statement as follows:

Remove tags before slaughter. Wrap used tags in plastic bag or newspaper and discard in trash.

4. Submit five copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

5. On the Confidential Statement of Formula (CSF), Block 17 was not completed. We assume the total weight is 1000 lbs. Please verify.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Directions for Use:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of pesticide application.

For the Control of Horn Flies (including pyrethroid resistant horn flies) on Beef and Dairy Cattle (including lactating) and as an Aid to Control Face Flies.

Apply tags when flies appear in spring. Attach one tag to each ear (two per head) with the Allflex™ Tagging system:

(illustration)

Figure 1  
Disinfect pliers prior to use. Place male button onto pin until it projects through the tip.

(illustration)

Figure 2  
Slide tag under the clip of the pliers by depressing the lever.

(illustration)

Figure 3  
Position tag in the center portion of the front side of the ear.

(illustration)

Figure 4  
Apply the tag between the second and third rib cartilage.

All mature animals in the herd should be tagged. Replace as necessary. Tags remain effective for up to 5 months. Remove tags at the end of the fly season or before slaughter.

Continual exposure of horn flies to a single class of insecticide (e.g. pyrethroids or organophosphates) may lead to the development of resistance to that class of insecticide. In order to reduce the possibility of horn flies developing resistance it is important to rotate the class of insecticide used and/or the method of horn fly control on a seasonal basis.

Storage and Disposal:

Do not contaminate water, food or feed by storage or disposal.

Storage: Store in cool place in original container. Opened pouches containing ear tags should be resealed for storage.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Dispose of empty pouch in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned stay out of smoke.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

W A R N I N G

May be fatal if swallowed, inhaled or absorbed through the skin. Do not breathe vapors. Do not get in eyes, on skin or on clothing. Wear nonpermeable protective gloves when applying or removing tags.

STATEMENT OF PRACTICAL TREATMENT

**If swallowed:** Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching the back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

**If inhaled:** Remove victim to fresh air. Get medical attention if victim displays signs of poisoning.

**If on skin:** Remove contaminated clothing and wash affected areas with soap and water.

**If in eyes:** Flush eyes with plenty of water. Call a physician if irritation persists.

**Note to Physician:** This product is a cholinesterase inhibitor. If symptoms of cholinesterase inhibition are present, atropine sulfate is antidotal. 2-PAM is also antidotal and may be administered in conjunction with atropine.

**Environmental Hazards:** This pesticide is highly toxic to shrimp, fish and wildlife. Do not apply directly to water. Birds, fish, shrimp and crabs in treated areas may be killed. Do not contaminate water when disposing of used tags.
