Mr. Terry McNamara
Miles Inc.
Agriculture Division, Animal Health Products
P.O. Box 390
Shawnee Mission, KS 66201-0390

Dear Mr. McNamara:

Subject: Additional Labeling Pests
Cutter Blue Ear Tag
EPA Registration No. 11556-105
Cutter Gold Ear Tag
EPA Registration No. 11556-106
Your Submissions Dated April 27, 1993

The Cutter Gold Ear Tag (11556-106) labeling submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, provided that you make the labeling changes listed below before you release the product for shipment bearing the amended labeling:

- The IF IN EYES statement should read:
"....a physician if irritation persists."

Submit five copies of your final printed labeling before you release the product for shipment.

The Cutter Blue Ear Tag (11556-105) is not acceptable for the following reason:

We are unaware of any product with the active ingredient Fenthion that is registered for use against ticks. You must either cite a Fenthion product registered for use on ticks or provide efficacy data on your product supporting the tick claim.

Sincerely,

George T. LaRocca
Product Manager 13

Directions for Use:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of pesticide application.

For the Control of Horn Flies, Gulf Coast Ticks, Spinose Ear Ticks and as an Aid to Control Face Flies On Beef and Dairy Cattle (including lactating).

Apply tags when flies appear in spring. Attach one tag to each ear (two per head) with the Allflex® Tagging system:

(Illustration)	(Illustration)	(Illustration)	(Illustration)
Figure 1	Figure 2	Figure 3	Figure 4
Disinfect pliers prior to use. Place male button onto pin until it projects through the tip.	Slide tag under the clip of the pliers by depressing the lever.	Position tag in the center portion of the front side of the ear.	Apply the tag between the second and third rib cartilage.

All mature animals in the herd should be tagged. Replace as necessary. Tags remain effective for up to 5 months. Remove tags at the end of the fly season or before slaughter.

Continual exposure of horn flies to a single class of insecticide (e.g. pyrethroids or organophosphates) may lead to the development of resistance to that class of insecticide. In order to reduce the possibility of horn flies developing resistance it is important to rotate the class of insecticide used and/or the method of horn fly control on a seasonal basis.

Storage and Disposal:

Do not contaminate water, food or feed by storage or disposal.

Storage: Store in cool place in original container. Opened pouches containing ear tags should be resealed for storage.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Dispose of empty pouch in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned stay out of smoke.
