## Insecticide Cattle Ear Tag

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS CAUTION

May cause eye irritation. Harmful if swallowed, inhaled or absorbed through the skin. Avoid contact with eyes, skin or clothing. Avoid breathing vapors.

Do not contaminate feed or food. Keep out of reach of children.

Wash thoroughly with soap and warm water after handling.

### STATEMENTS OF PRACTICAL TREATMENT

**If swallowed:** Call a physician or Poison Control Center.

**If inhaled:** Remove victim to fresh air. Get medical attention if victim displays signs of poisoning.

**If on skin:** Remove contaminated clothing and wash affected areas with soap and water.

**If in eyes:** Flush eyes with plenty of water. Call a physician if irritation persists.

**Environmental Hazards:** This pesticide is toxic to fish. Do not contaminate water when disposing of used tags. Apply this product only as specified on this label.

## Insecticide Cattle Ear Tag

### Directions for Use:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of pesticide application.

For the Control of Horn Flies, Gulf Coast Ticks, Spinose Ear Ticks, and as an Aid to Control Face Flies on Beef and Dairy Cattle (including lactating).

Apply tags when flies appear in spring. Attach one tag to each ear (two per head) with the Allflex<sup>™</sup> Tagging system.

Figure 1  
Disinfect pliers prior to use. Place male button onto pin until it projects through the tip.

Figure 2  
Slide tag under the clip of the pliers by depressing the lever.

Figure 3  
Position tag in the center portion of the front side of the ear.

Figure 4  
Apply the tag between the second and third rib cartilage.

All animals in the herd should be tagged. Replace as necessary. Tags remain effective for up to 5 months. **Remove tags at the end of the fly season or before slaughter.**

Continual exposure of horn flies to a single class of insecticide (e.g. pyrethroids or organophosphates) may lead to the development of resistance to that class of insecticide. In order to reduce the possibility of horn flies developing resistance it is important to rotate the class of insecticide used and/or the method of horn fly control on a seasonal basis.

### Storage and Disposal:

Do not contaminate water, food or feed by storage or disposal.

**Storage:** Store in cool place in original container. Opened pouches containing ear tags should be resealed for storage.

**Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**Container Disposal:** Dispose of empty pouch in a sanitary landfill or by incineration if allowed by state and local authorities. If burned stay out of smoke.
