<b>USE RATE</b>	1.5 oz/250 sq ft (scatter bait and bait station)
<b>HOW TO APPLY</b>	<b>Do not place QuickBayt Fly Bait in areas accessible to animals, children and pets.</b>
	Apply the bait in many locations. Avoid cool or windy locations because flies prefer warm, motionless sites for resting. Time applications to begin at the start of the season before fly populations have reached their peak.
	<b>Scatter Application:</b> Scatter the bait directly from the container onto dry level surfaces so that the individual granules lie near each other without forming small piles.
	<b>Bait Station Application:</b> Place in any fly bait station. Use 1 bait station to cover approximately 250 sq ft, and add up to 1.5 oz of bait per station. Secure bait stations at least 4 feet above the ground.
	<b>Paint-on Application:</b> Mix 1.5 oz bait with 1 fl oz warm water (3 lbs bait in 1 quart water) and stir thoroughly. Let stand for about 15 minutes until a paste consistency suitable for painting has formed. Apply the paste with a brush to surfaces where flies rest avoiding surfaces that are dusty.
