Call your gas utility or management company if you need assistance with your pilot lights. Do not remain in the area during treatment and ventilate thoroughly before re-entry.

**TO OPERATE VALVE:** To lock valve in open position for automatic discharge, press valve button all the way down, hooking the catch. Then place fogger on stand or table in the center of the room with valve locked open, placing several layers of newspaper or pad under the fogger. Leave building at once and keep building closed for four hours before airing out. Open all doors and windows and allow to air for 30 minutes. Repeat spraying in two weeks or when necessary.

**To Kill Ticks and Fleas:** Destroy pet's old bedding or replace. Use product as above. Treat dogs and cats with registered tick control product prior to re-entry.
