**Precautionary Statements
Hazards to Humans
and Domestic Animals
CAUTION**

Harmful if swallowed or absorbed through skin. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after use. Avoid contamination of food and feedstuffs. Care should be taken to avoid depositing this product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food handling surfaces.

Keep children and domestic animals off treated areas until dry. Do not use this product on pets.

Physical or Chemical Hazards
Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Not for use in commercial food/feed handling establishments, restaurants, or other commercial facilities. Not for use in institutions.

Use Barrier II Residual Insecticide as a spot or crack and crevice treatment to control cockroaches, waterbugs, silverfish, ticks, fleas and other insects listed below. Apply this product only as a coarse spray or crack and crevice treatment to localized areas where pests are found or may occur.

HOW TO USE: To Kill Ants, Cockroaches, Crickets, Centipedes, Silverfish, Firebrats, Earwigs, Sowbugs, Pillbugs and Spiders: Spray to contact as many insects as possible while thoroughly spraying all areas where the pests are suspected of hiding, such as the floor and baseboard areas of the pantry, food and pet food storage areas, cracks and crevices in walls and flooring materials, under sinks, under stoves, under refrigerators, around garbage containers, cabinets, door and window sills, thresholds, door and window frames, around floor drains, storage and utility installation areas, wall voids and where plumbing goes through the walls. Spray surfaces to wet. For Ants, also spray ant trails and the places where these pests come into the building. Reapply after two weeks to continue residual kill.

To Kill Carpet Beetles: Spray beetles when they are seen. Thoroughly vacuum and then

spray surface of carpets and rugs in areas such as under sofas, chairs, tables, desks, and other low traffic areas (corners of rooms, closets, shelves) where the pests are seen. Spray the underside of rugs and carpets, when possible, allowing sprayed areas to dry before replacing on floor.

To Kill Fleas and Ticks: Prior to treatment, thoroughly vacuum the floor, upholstered furniture, baseboards, and pay special attention to areas where pets rest and areas under furniture. Remove and dispose of the vacuum bag containing ticks, fleas and flea eggs, larvae, and pupae in the garbage, preferably putting it into a plastic bag that can be securely closed. Discard in outside trash. This will prevent escapes which will reinfest the area. Apply as a spot treatment to areas such as the pet resting areas, pet bed, cracks and crevices, along baseboards, under furniture, and other areas where fleas and ticks are seen.

To prevent reinfestation of the treated area with fleas and ticks, and to protect your pets, treat the animals with an EPA registered product labeled for use on animals and also treat the outdoor areas with an EPA registered product labeled for that use.

**STATEMENT OF
PRACTICAL TREATMENT**

IF SWALLOWED: Call a physician or Poison Control Center immediately. **IF ON SKIN OR CLOTHING:** Remove contaminated clothing and wash before reuse. Wash skin with plenty of soap and water. Get medical attention if irritation persists. **IF IN EYES:** Flush eyes with water for 15 minutes. Get medical attention if irritation persists.

For information regarding medical emergencies or pesticide incidents, call the International Poison Control Center at 1-888-740-8712.

STORAGE AND DISPOSAL

Storage: Store product in a cool, dry place, preferably a locked storage area. **Pesticide Disposal:** Please use all product according to label directions, however, unused product may be disposed of by wrapping in several layers of newspaper and discard in trash. **Container Disposal:** Replace cap of empty container and offer for recycling if available in your area. If recycling is not available, wrap container in several layers of newspaper and discard in trash.
