

DIRECTIONS FOR USE

Avitrol is a pesticide for the control of certain species pest birds. It is composed of a choice bird food impregnated with an active bird management chemical. Birds ingesting Avitrol react with distress symptoms and calls. By limiting the amount of bait available to relatively few birds, the remainder of the flock can be frightened away from most roosts and feeding sites with a minimum of mortality. For best results the application should be made at the proper time and place under the direction of trained personnel.

Restrictions with untreated feeds of the same composition as the Avitrol bait are usually essential to the effective control of birds with Avitrol. Careful observation of bird habits should be made to establish proper feeding locations and to determine that no desirable or protected bird species are present that may feed on Avitrol. After pest bird feeding is established, immediately replace untreated grain with Avitrol. Repeat Avitrol treatments until bird numbers have been reduced to acceptable levels on the premises.

Avitrol grain is lethal to most birds that ingest enough to cause the K-frightening symptoms. To obtain the desired minimal mortality, the distribution of Avitrol grain should be limited to scattered spot placements that will provide feeding opportunity for the necessary number of demonstrating birds. The remainder of the feeding area may be covered with untreated grain to provide desirable nutrition.

AVITROL MUST NOT BE EXPOSED IN ANY MANNER THAT MAY ENDANGER RELEASABLE AND PROTECTED WILD BIRDS. THERE IS A QUESTION OF SUCH HAZARD. CONSULT LOCAL, STATE, AND FEDERAL GAME AUTHORITIES BEFORE UNDERTAKING BIRD MANAGEMENT WITH AVITROL. INVESTIGATE LOCAL LAWS THAT MAY PROHIBIT THE USE OF ANTI-BIRD CHEMICAL IN BIRD CONTROL.

AVITROL

MIXED GRAINS

For the Control of
SPARROWS, CERTAIN BLACKBIRDS
AND COWBIRDS IN, ON
OR IN THE AREA OF STRUCTURES
NESTING AND ROOSTING SITES

This product is sold under the supervision of government agencies or pest control inspectors. Not for sale to the public.

Active ingredients		
4-Aminopyridine	0.5%	
Inert ingredients	99.5%	
Mixed grains	99.31	
Hydrogen chloride	0.19

CAUTION

KEEP OUT OF REACH OF CHILDREN

May produce toxic symptoms if swallowed or by prolonged and repeated contact with the skin. Handle with protective gloves. Wash thoroughly with soap and water after handling, before eating or smoking. Change to clean clothing after handling. If swallowed induce vomiting and call a physician. Do not feed to livestock or chickens. Do not mix with grain for livestock feed or for human consumption. Do not contaminate streams, lakes or ponds with this material. Do not allow this material to remain in unprotected places after control measures are completed. Do not use where food (grain or meat) will become contaminated.

NOTICE: Buyer and user should read all risks of use and on handling of these materials carefully to other instructions.
