

DIRECTIONS FOR USE

Avitrol is a pesticide for the control of certain species of pest birds. It is composed of a choice bird food impregnated with an active bird management chemical. Birds ingesting Avitrol react with distress symptoms and calls. By limiting the amount of bait available to relatively few birds, the remainder of the flock can be frightened away from most roosts and feeding sites with a minimum of mortality. For best results the applications should be made at the proper time and place under the direction of trained personnel.

Prefeeding with untreated feeds of the same composition as the Avitrol carrier is usually essential to the effectiveness of birds. Careful observation of bird habits should be made to establish pre-feeding locations and to determine that no desired or protected bird species are present that may feed on Avitrol. After best bird feeding is established immediately replace untreated grain with Avitrol. Repeat Avitrol treatment until bird numbers have been reduced to acceptable levels on the premises.

For the control of starlings in feeders corn bait is rendered much more attractive by mixing 4 parts with 1 part of peanut butter. This mixture must be used in elevated feeders out of reach of pets and farm animals.

Avitrol grain is lethal to most birds that ingest enough to cause flock-frightening symptoms. To obtain the desired minimal mortality the distribution of Avitrol grain should be limited to scattered spot placements that will provide feeding opportunity for the necessary number of demonstrating birds. The remainder of the feeding area may be covered with untreated grain to provide desirable dilution.

AVITROL MUST NOT BE EXPOSED IN ANY MANNER THAT MAY INDUCE AN UNAPPETIZABLE AND PROTECTED BIRD FEEDING. THERE IS A QUESTION OF SUCH HAZARD ONLY IF LOCAL STATE AND FEDERAL GAME COMMISSIONS REQUIRE UNDERTAKING BIRD MANAGEMENT WITH AVITROL. INVESTIGATE LOCAL LAWS THAT MAY IMPLY THE USE OF AVITROL AS AN INSECTICIDE OR PESTICIDE.

DOUBLE STRENGTH CORN CHOPS

For the Control of
CERTAIN BLACKBIRDS, COWBIRDS,
AND STARLINGS

For use by individuals, hobbyists, county government agencies or pest control operators. Not formulated for public use.

Active Ingredients

4-Aminopyridine	1.0%
Other Ingredients	99.0%
Corn	98.6%
Hydrogen Chloride	0.3%

Net Contents

CAUTION

KEEP OUT OF REACH OF CHILDREN

May produce toxic symptoms if swallowed or by prolonged and repeated contact with the skin. Handle with protective gloves. Wash thoroughly with soap and water after handling before eating or smoking. Change to clean clothing after handling. If swallowed induce vomiting and call a physician. Do not feed to livestock or chickens. Do not mix with grain for livestock feed or for human consumption. Do not return to streams, lakes, or ponds with this material. Do not allow this material to remain in equipment after use. Do not bury or burn. Impaired health may result from continued use of this product.
