

## DIRECTIONS FOR USE

Avitrol whole corn is a pesticide for the control of feral pigeons. It is composed of a choice pigeon food impregnated with the bird management chemical 4-aminopyridine. Untreated whole corn mixed as directed with Avitrol whole corn minimizes the possibility of distress symptoms which can occur when more than a sufficient quantity of Avitrol is ingested. Best results for the control of pigeons are obtained when a large portion of the flock is affected mildly. When properly administered few birds exhibit distress symptoms and little mortality occurs.

Prefeeding with untreated whole corn of the same appearance as the Avitrol carrier is unusually essential to the effective deterrence of birds. Careful observation of bird habits should be made in order to establish proper feeding locations where no desirable or protected bird species are present that may be able to feed on Avitrol whole corn. After pest bird feeding is established, immediately replace untreated grain with Avitrol as directed below.

For the control of pigeons in urban areas violent flock alarming reactions produced by Avitrol which can be lethal are not generally desirable or necessary. To obtain minimum mortality the Avitrol whole corn should be thoroughly mixed with 29 parts of similar untreated whole corn. Placement should be made in high locations on buildings and ledges where prefeeding has been established. In most areas, where ample food is already available, dilution with 10 or 20 parts of untreated corn is recommended. Repeat treatment until bird numbers have been reduced to acceptable levels on the premises.

AVITROL MUST NOT BE EXPOSED IN ANY MANNER THAT MAY ENDANGER DESIRABLE AND PROTECTED BIRD SPECIES. IF THERE IS A QUESTION OF SUCH HAZARD, CONSULT LOCAL, STATE AND FEDERAL GAME AUTHORITIES BEFORE UNDERTAKING BIRD MANAGEMENT WITH AVITROL. INVESTIGATE LOCAL LAWS THAT MAY PROHIBIT THE USE OF ANY TOXIC CHEMICAL IN BIRD CONTROL.

# AVITROL

## WHOLE CORN

For the Control of  
**FERAL PIGEONS IN, ON OR IN THE AREA OF  
STRUCTURES, NESTING AND ROOSTING  
SITES**

For use by, or under the supervision of government agencies or pest control operators. Not for sale to the public.

Active Ingredients		
4--Aminopyridine	0.5%	
Inert Ingredients	99.5%	
Corn	99.31	
Hydrogen Chloride	0.19	
Net Contents		lbs

**AVITROL CORPORATION  
TULSA, OKLAHOMA**

EPA Reg. No. 11649-7  
U.S. Patent 3,150,041

## CAUTION

### KEEP OUT OF REACH OF CHILDREN

May produce toxic symptoms if swallowed or by prolonged and repeated contact with the skin. Handle with protective gloves. Wash thoroughly with soap and water after handling, before eating or smoking. Change to clean clothing after handling. If swallowed induce vomiting and call a physician. Do not feed to livestock or chickens. Do not mix with grain for livestock feed or for human consumption. Do not contaminate streams, lakes or ponds with this material. Do not allow this material to remain in unprotected places after control measures are completed. Do not use where food (grain or meat) will become contaminated.

NOTICE: Buyer and/or user assumes all risks of use and/or handling of these materials, contrary to label instructions.
