.2% GRAIN BAIT FOR POCKET GOPHER

CONTAINS ®GOPHACIDE FOR HAND OR BURROW MACHINE BAITING

Active Ingredient:
O,O-bis(p-chlorophenyl)
acetimidoylphosphorothioate 0.2%
Inert Ingredients 99.8%
100.0%

WARNING

KEEP OUT OF REACH OF
CHILDREN

Additional CAUTION, WARNING, RESTRICTION and ANTIDOTE STATEMENTS on right panel.

STOP — READ THIS LABEL BEFORE USE

WARNING

May be harmful or fatal if swallowed or absorbed through the skin. Do not get in eyes or on skin. This material. Repeated contact with the skin may increase hazard of handling. Wear cotton or natural rubber gloves when cotton gloves are used, they must be laundered or discarded after each day's use. Always wash thoroughly with warm water after handling. Wash contaminated clothing with soap and water before reuse.

Do not store or use in an area where there is possibility of children or animals gaining access to the material. Carcasses of animals poisoned by the bait.

If poisoning occurs, obtain prompt medical aid. Prolonged exposure will result in cholinesterase depression. Induce vomiting by giving a tablespoonful of salt in a glass of warm water. Administer milk or water freely and vomit until vomit fluid is clear. If eyes are contaminated, wash with flowing water for at least 15 minutes.

FISH AND WILDLIFE: This product is toxic to fish and wildlife. Keep out of any body of water. Treated bait on surface will be hazardous to birds and other wildlife. Apply this product only as specified on this label.

ANTIDOTE: Although atropine may be less effective as an antidote with this than with some other organic phosphorus compounds, it should be used in large therapeutic doses in cases of acute poisoning. Repeat as necessary to the point of recovery.

RESTRICTIONS: For use only by personnel experienced in pocket gopher control. Consult your local, county or state rodent control experts for advice on how to best use this product safely and efficiently. Apply only in burrows above ground surface. Control of other rodent species is not recommended, since evaluations have not yet been completed.

NET WEIGHT _____ POUNDS

Available in 1#, 3#, 5#, 10#, 25# and 50# bags.

GOPHACIDE is Reg. TM in U.S. Pat. Off. by Farbenfabriken Bayer A.G., Chemagro Corporation licensee.

EPA Reg. No. 11656-67

DIRECTIONS FOR USE

.2% Grain Bait for Pocket Gophers is very effective for the control of the valley (Thomomys bottae) pocket gopher. Bait preparations are and death usually occurs within 24 to 48 hours after the bait is eaten. The mountain (Thomomys talpoides) and plains (Geomys bursarius) gophers are also controlled by this concentration. **HOW TO APPLY:** Place in artificial burrows made with suitable burrow building equipment. Use 1 lb. Bait for Pocket Gophers per acre in burrows spaced at 20 foot intervals or 1 lb. per acre in burrows spaced at 30 foot intervals. Treatment to natural burrows using 1 teaspoon of .2% Grain Bait for Pocket Gophers per burrow, but not to exceed 1 1/2 # per acre of area to be treated.

DO NOT REUSE THIS CONTAINER — Completely empty the contents and bury the unused chemical at least 18 inches deep in an isolated area from water supplies.

Burn the empty container completely. Exercise extreme caution and stay well away from the smoke.

Do not use the container in any connection with feed, food, or drinking water.

CONTAINS ©GOPHACIDE FOR HAND OR BURROW MACHINE BAITING

STOP — READ THIS LABEL BEFORE USE WARNING

May be harmful or fatal if swallowed or absorbed through the skin. Do not get in eyes or on skin. This material is cumulative. Repeated contact with the skin may increase hazard of handling. Wear cotton or natural rubber gloves while handling. If cotton gloves are used, they must be laundered or discarded after each day's use. Always wash thoroughly with soap and warm water after handling. Wash contaminated clothing with soap and water before reuse.

Do not store or use in an area where there is possibility of children or animals gaining access to the material or to the carcasses of animals poisoned by the bait.

If poisoning occurs, obtain prompt medical aid. Prolonged exposure will result in cholinesterase depression. If swallowed, induce vomiting by giving a tablespoonful of salt in a glass of warm water. Administer milk or water freely and again induce vomiting until vomit fluid is clear. If eyes are contaminated, wash with flowing water for at least 15 minutes.

FISH AND WILDLIFE: This product is toxic to fish and wildlife. Keep out of any body of water. Treated bait exposed on soil surface will be hazardous to birds and other wildlife. Apply this product only as specified on this label.

ANTIDOTE: Although atropine may be less effective as an antidote with this than with some other organic phosphorus compounds, it should be used in large therapeutic doses in cases of acute poisoning. Repeat as necessary to the point of tolerance.

RESTRICTIONS: For use only by personnel experienced in pocket gopher control. Consult your local, county, or state rodent control experts for advice on how to best use this product safely and efficiently. Apply only in burrows. Do not use above ground surface. Control of other rodent species is not recommended, since evaluations have not yet been completed.

DIRECTIONS FOR USE

.2% Grain Bait for Pocket Gophers is very effective for the control of the valley (*Thomomys talpoides*) pocket gopher. Bait preparations are readily accepted and death usually occurs within 24 to 48 hours after the bait is eaten. The mountain (*Thomomys talpoides*) and plains (*Geomys bursarius*) gophers are also controlled by this concentration. **HOW TO APPLY:** Place in artificial burrows made with suitable burrow building equipment. Use 1 1/2 lbs. of .2% Grain Bait for Pocket Gophers per acre in burrows spaced at 20 foot intervals or 1 lb. per acre in burrows spaced at 30 foot intervals. Treatment may also be made to natural burrows using 1 teaspoon of .2% Grain Bait for Pocket Gophers per burrow, but not to exceed 1 1/2 lbs. per acre of area to be treated.

DO NOT REUSE THIS CONTAINER — Completely empty the contents and bury the unused chemical at least 18 inches deep in an isolated location away from water supplies.

Burn the empty container completely. Exercise extreme caution and stay well away from the smoke.

Do not use the container in any connection with feed, food, or drinking water.
