RADICATE

NON SELECTIVE
WEED KILLER
for
NON CROP AREAS

Equivalent to 1 pound of Monuron trichloroacetate per gallon

READ THE ENTIRE LABEL BEFORE USING THIS PRODUCT

CAUTION: Keep Out Of Reach Of Children And Animals

Harmful if swallowed. Irritating to skin, and to eyes. Do not get on skin or eyes or on clothing. In case of contact, immediately wash skin with plenty of water. For eyes, wash with water for at least 15 minutes and get medical attention.

Do not use or store near heat or open flame.

Do not allow this product to contaminate any water either by direct application, spray drift, disposal of wastes, or washing of spray equipment after use.

Do not allow this product to come in contact with crops, plants, lawns, or ornamental trees or plants, or to areas where their roots may extend, and do not allow the product to contact fertilizers, pesticides or seeds. Destroy this container when it is empty.

DIRECTIONS FOR USE

For general weed control on non-crop areas, mix RADICATE at a rate of 1 gallon with 4 to 7 gallons of water in a sprayer that will give uniform coverage on 1600 square feet. Add RADICATE to water with agitation. For small areas or spot treating, mix 6 ounces (1 pint or 1 cup) per 100 square feet with 1 to 1½ quarts of water. For band treatment along fence lines and curbs, 8 ounces of RADICATE will treat a 4 inch band 300 feet long. Best results are obtained if tall vegetation is mowed off and the litter removed before treatment, or when vegetation first begins to appear in the growing season. Rain or thorough watering following treatment will speed results. RADICATE penetrates to the root zone. Retreatments may be necessary in 6 to 12 months depending on soil type, rainfall following treatment, and weed species present.

NOTICE

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
