ACCEPTED

JUL 11 1973

UNDER THE FEDERAL INSECTICIDE,
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTERED
REG. NO. 11659-7*Comments*

Walling A-231X is used to inhibit the growth of algae, bacteria, and fungi in recirculating commercial and industrial cooling water systems. Before treatment with Walling A-231X, systems must be cleared to remove algal growth, microbiological slime, and other deposits. Then the system should be treated with an initial slug addition of 1.4 to 6.6 fluid ounces of Walling A-231X per 1,000 gallons of water in the system. Repeat the initial dosage until control is evident. Subsequent slug additions of 1.4 to 6.6 fluid ounces of Walling A-231X per 1,000 gallons of water should be made every 1 to 5 days, as needed. The required frequency of treatment depends on the relative amount of bleed-off and the severity of the microbiological problem. Slug additions of Walling A-231X should be made to the cooling water cooling towers.

WARNING—KEEP OUT OF REACH OF CHILDREN

Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. If mouth or throat swallowed. Avoid contact with eyes. If eyes contact with product, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash out contaminated clothing before reuse.
