## CAPTAN 5 DUST POTATO SEED TREATER

### AN AGRICULTURAL FUNGICIDE

**DESCRIPTION**

Captan 5 Dust is a fungicide which is effective against a wide range of potato diseases. It is used to protect potato seed pieces from rot and other diseases caused by fungi. It is applied to seed pieces before planting. It is a white, free-flowing powder which is easily dispersed in water. It is not harmful to the potato plant or to the soil. It is safe for use on all potato varieties. It is effective against a wide range of potato diseases, including late blight, early blight, and late blight. It is also effective against other diseases such as scab, silver scurf, and tuber rot. It is a contact fungicide which acts by preventing the germination of spores. It is not a systemic fungicide. It is safe for use on all potato varieties. It is effective against a wide range of potato diseases, including late blight, early blight, and late blight. It is also effective against other diseases such as scab, silver scurf, and tuber rot. It is a contact fungicide which acts by preventing the germination of spores. It is not a systemic fungicide.

**ACTIVE INGREDIENT:**  
Captan (Methyl trichloroethyl, 3,4-dichlorophenyl 2-thiophenoximide) 5%

**OTHER INGREDIENTS:** 95%

**Net Weight:** 50 lbs. (22.7 kg) per 50 lb. container

EPA Reg. No. 642-6  
SUB. REG. NO. 476-586-15154

**CAUTION** Keep Out of Reach of Children

**HARMFUL IF TAKEN INTERNALLY**

AVOID INHALATION OF DUST

**RECOMMENDATIONS**

**POTATO (SEED PIECE) TREATMENT:** Dump of Seed Rot, Brown Eye Disease, verticillium wilt. Use at rate of 20 ozs. per bushel (or 2 lbs. per 100 lbs.) of seed pieces. Apply in convenient container or by dust attachment over belt. Coat each seed evenly with 1 lb. of dust. Treat pieces within 24 hours of planting. If planting is delayed, store treated seed pieces in open crates two days before planting.

**DIRECTIONS FOR USE**

**POTATO SEED PIECE:** Planting and storage. Before planting, cutting, handling, or storage in bins, barrels, sacks, or planters should be thoroughly cleaned and sanitized. Do not spread or plant seed potatoes to temperatures of 50° to 60° F. and about 10 to 15° F. before handling them.
