

STUMP TREATMENT: Dilute 3 gallons of product with 97 gallons of oil (1 pint in 4 gallons), and apply to freshly cut stumps of large trees or woody plants. For best results, both sides of top of stump should be thoroughly wet. Application can be made any time of the year except when snow or water prevents application to the cut line. Repeat application should be made as soon as possible.

TRUNK INJECTION: For control of trees having trunks more than 6 inches in diameter, make overlapping cuts in the bark around the trunk as close to the ground as possible. Treat fresh cuts with a mixture of 2 gallons of product in 98 gallons of oil (1 pint in 3 gallons). Holes should be filled to overflowing with the chemical. Application may be made at any time of the year, but more time is required for kill during dormant season.

DORMANT BRUSH SPRAY: Mix 1 1/2 gallons of product with 100 gallons of oil. Spray any time after brush is dormant. Concentrate spray at base of stems, then spray the upper parts of stems enough to wet them. Dense brush 6 to 8 feet tall will require about 150 gallons of this mixture.

CAUTION

Although the recommended use of this product in tree injectors will reduce hazards of application, damage may occur to susceptible crops in adjacent areas. If sprayed, avoid spray drift to susceptible plants as this product may injure cotton, beans, pear, grapes, ornamentals, or other desirable plants. Use a coarse spray, which is less likely to drift.

Vapors from this product may injure susceptible plants in the immediate vicinity.

DO NOT contaminate any body of water by direct application, chemical or equipment, or allow to flow into and contaminate. Toxic to fish.

DO NOT use this product near fertilizers, seeds, insecticides, or fungicides. DO NOT contaminate feed or foodstuffs.

DO NOT use spray equipment contaminated with this product for any other purpose. Clean spray equipment thoroughly with a suitable solvent before using for other purposes (preferably do not use spray equipment for any other purpose).

If stored below freezing, it may be necessary to warm to 40°F. and agitate before using. This does not affect the efficiency of the product. DO NOT mix with liquid fertilizers.

DO NOT reuse empty containers. Destroy by burning in an isolated place away from water supplies.

CAUTION

This product may cause skin irritation. Avoid inhaling spray mist. Harmful if swallowed. Avoid contact with the eyes, skin, or clothing. In case of contact with skin or eyes, immediately flush with plenty of water and get medical attention for eyes. Wash clothing before reuse. Keep away from heat or open flame.

Keep out of reach of children.

NONWARRANTY

Hercules warrants that this herbicide conforms to the chemical description on its label. When used in accordance with label directions under normal conditions, this herbicide is reasonably fit for its intended purpose. Since timing, method of application, weather, plant and soil conditions, mixture with other chemicals, and other factors affecting the use of this product are beyond our control, no warranty is given concerning the use of this product contrary to label directions or under conditions which are abnormal or not reasonably foreseeable. The user assumes all risks of any such use.
