

## WHERE TO USE

WEED-RHAP A-6D is used to control broad-leaved weeds in cereal crops, corn, sorghum, flax, weeds and brush in pastures, turf rights of way, similar noncrop uses, and for aquatic weed control.

## PLANTS CONTROLLED

WEED-RHAP A-6D will kill or control the following as well as many other noxious plants susceptible to 2,4-D.

Arrowhead	Goldenrod	Puncturevine
Artichoke	Ground ivy	Purslane
Birdweed, hedge, field, and European)	Hemp	Rush
Bitter wintercress	Hoary cress	Russian thistle
Boxelder	Honeysuckle	Sagebrush
Buckhorn	Indigo	Shepherdspurse
Bull thistle	Ironweed	Smartweed
Bulrush	Jimsonweed	Sowthistle
Burdock	Lambsquarters	Stinkweed
Bur ragweed	Locoweed	Sumac
Buttercup	Mexicanweed	Sunflower
Canada thistle	Morningglory	Virginia creeper
Catnip	Mustard	Waterhyacinth
Chickweed	Nutgrass	Waterlily
Chicory	Parrotfeather	Waterprimrose
Cocklebur	Pennywort	Wild garlic
Coffeebean	Pigweed	Wild lettuce
Creeping Jenny	Plantain	Wild onion
Curly indigo	Poison ivy	Wild radish
Elderberry	Pokeweed	Willow
	Povertyweed	Witchweed

## DIRECTIONS FOR USE

Mix the recommended amount of product with sufficient water to obtain good spray coverage. Do not mix this product with oil. Best results are obtained when applications are made while the weeds are young and actively growing.

**On Fall-Planted Wheat, Oats, and Barley**—Use  $\frac{3}{4}$  to 1 pint of product in 5 to 10 gallons of water to cover one acre. Apply in early spring when weeds are small and before the crop has reached the boot stage.

**On Spring-Planted Wheat, Oats, and Barley**—Use  $\frac{3}{4}$  pint in 5 to 10 gallons of water to cover one acre. Apply after the fully tilled stage, except during the boot to dough stage.

**DO NOT forage or graze treated grain fields within two weeks after treatment with 2,4-D.** DO NOT feed treated straw to livestock.

**On Corn and Sorghum**—Use  $\frac{3}{4}$  pint in 5 to 10 gallons of water to cover one acre when weeds are in active growth. Local climatic condition determines when treatment should be made. Best results are usually obtained when weeds are small and corn is 4 to 18 inches tall. Do not apply from tasseling to dough stage. Treat sorghum when 4 to 12 inches tall. Use drop nozzles when either crop is over 10 inches tall.

**On Flax**—Use  $\frac{1}{2}$  pint in 10 to 15 gallons of water to cover one acre. Apply when flax is 3 inches high to first bud stage. Do not apply after the flax has formed flower buds.

**On Rice**—Use  $\frac{3}{4}$  to 1 quart in 5 to 10 gallons of water to cover one acre when weeds are in active growth stage. Rice plants are sensitive to 2,4-D in early stages of growth; therefore, it is advisable to delay spraying until the second or third week after flooding. Water in the field should be shallow enough to permit direct application of the spray material to the weeds. Make all treatments well in advance of heading.

**For Aquatic Weeds in lakes, ponds, drainage ditches, and marshes**—Use  $1\frac{1}{2}$  to 3 pints of product in 50 to 100 gallons of water per acre. Apply in enough water to wet foliage thoroughly. Application should be made when leaves are fully developed above water line and plants are actively growing. DO NOT apply to more than  $\frac{1}{3}$  to  $\frac{1}{2}$  of a lake or pond in any one month, because excessive decaying vegetation may deplete oxygen content of water, killing fish.

**On Pastures, Ornamental Turf, and Noncrop Areas**—Use  $\frac{3}{4}$  to  $1\frac{1}{2}$  quarts and enough water to give sufficient coverage to one acre on established stands of perennial grasses, depending on type of weeds and stage of growth. Do not use on creeping grasses such as bent except for spot spraying. Newly seeded turf should not be treated until after the second mowing and at the lower dosage rate.

**DO NOT graze dairy animals on treated areas within seven days after application.**

**Perennial and Other Hard-to-Control Weeds** may require a repeat application to give adequate control.

# HERCULES WEED-RHAP®

**CAUTION: KEEP OUT OF REACH OF CHILDREN.**  
READ SIDE PANEL FOR ADDITIONAL HANDLING PRECAUTIONS.

<b>ACTIVE INGREDIENT:</b>	
Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid (Equivalent to 57.4% of 2,4-Dichlorophenoxyacetic Acid)	69.1%
<b>INERT INGREDIENTS:</b>	30.9%
<b>TOTAL</b>	<b>100.0%</b>

USDA REGISTRATION NO. 891-62

## WARNING

**DO NOT** apply this product to susceptible broad-leaved plants that are desirable such as cotton, soybeans, tomatoes, grapes, clover, ornamentals. Excessive amounts of this product in the soil may temporarily inhibit seed germination and all plant growth.

Minute quantities may cause severe injury by drift. Avoid drift of spray and use a coarse spray which is less likely to drift.

**DO NOT** contaminate water in irrigation ditches or water used for domestic purposes.

Users should note that herbicide treatment of public waters requires a permit from appropriate state agencies in most states. Your State Conservation Department or Game and Fish Commission will aid you in securing a permit if required in your state.

**DO NOT** store this product near fertilizers, seeds, insecticides, or fungicides. DO NOT contaminate feed or foodstuffs.

**DO NOT** use spray equipment contaminated with this product for any other purpose. DO NOT apply insecticides, fungicides, or other agricultural products unless the equipment has been cleaned very carefully with a suitable chemical cleaner.

If stored below freezing, it may be necessary to warm to 40°F. and agitate before using. This does not affect the efficiency of the product.

**DO NOT** mix with liquid fertilizers.

**DO NOT** reuse empty containers. Destroy by burying in an isolated place away from water supplies.

## CAUTION

This product may cause skin irritation. Avoid inhaling spray mist. Do not take internally. Avoid contact with the eyes, skin, or clothing. Flush eyes with clear water and get prompt medical attention.

Keep out of reach of children.

## NONWARRANTY

Hercules warrants that this herbicide conforms to the chemical description on its label. When used in accordance with label directions under normal conditions, this herbicide is reasonably fit for its intended purpose. Since timing, method of application, weather, plant, and soil conditions, mixture with other chemicals, and other factors affecting the use of this product are beyond our control, no warranty is given concerning the use of this product contrary to label directions or under conditions which are abnormal or not reasonably foreseeable. The user assumes all risks of any such use.

[illegible]

Let  $(\gamma) \in \mathcal{A}^0$ ,  $A \in \mathcal{A}^1$  and  $\gamma \in \mathcal{A}^1$ . Then,  $\gamma \otimes A \in \mathcal{A}^1$  and  $\gamma \otimes \gamma \in \mathcal{A}^0$ .

[illegible]

Mix the recommended amount of product with sufficient water to obtain good spray coverage. Do not mix the product with flammable liquids, oil, fat and when a portion of water is made with the product, it is not flammable.

**On Fall Planted Wheat, Oats, and Barley**—Use  $\frac{1}{2}$  to 1 pint of prod.

On Spring Planted Wheat, Oats, and Barley - Use 2 1/2 pint in 5 to 10

DO NOT forage or graze treated grain fields within two weeks after

0. Corn and Sorghum—Use 1 pint in 5 to 10 gallons of water to spray on leaves. Do not spray on plants with silks or tassels.

**On Flax** - Use 1 pint in 10 to 15 gallons of water to cover one acre. Apply at 10 to 15 days after planting. Repeat at 10 to 15 day intervals until the plants are well established.

[illegible]

**For Aquatic Weeds in lakes, ponds, drainage ditches, and marshes:**

5. Pastures, Ornamental Turf, and Noncrop Areas. Use 1:1 to 1:2.

1. *Phragmites* spp. *Phragmites australis* (Cav.) Trin. ex Steud.
