

BRUSH-RHAP

2,4-D • 2,4-DP
2 LBS. OF 2,4-D AND 2 LBS. OF 2,4-DP ACID EQUIVALENT PER GALLON

DIRECTIONS FOR USE

AS WATER SPRAY— Add the recommended amount of product to water. Best results are obtained when plants are well watered. Water should be thorough wet with spray. Additional water may be necessary for growth control.

Add 1 to 1½ gallons of Brush-Rhap Low Volatile 2D-2DP to 100 gallons of water. Apply to plants at the recommended rate. This rate is for general use. For control of weeds, use 1½ to 2 gallons per acre.

AS OIL SPRAY— Add the recommended amount of product to diesel oil. Use for control of weeds and brush.

Basal Treatment— Dilute 3-4 gallons of product with 100 gallons of water. Apply to plants at the recommended rate. This rate is for general use. For control of weeds, use 1½ to 2 gallons per acre. Although basal treatments are effective, delayed response may be expected.

Stump Treatment— Dilute 3-4 gallons of product with 100 gallons of water. Apply to stumps of trees and shrubs. For best results, use a nozzle of medium pressure. For best results, both sides of top of stump should be sprayed. Application should be made on a dry day when spray or water prevents application. Application should be made within 24 hours.

Soil Treatment— For control of plants having roots more than 6 inches deep. Apply to soil at the recommended rate. This rate is for general use. For control of weeds, use 1½ to 2 gallons per acre. Application should be made on a dry day when spray or water prevents application.

AS OIL WATER AERIAL SPRAY— Best results are obtained when plants are well watered. Water should be thorough wet with spray. Additional water may be necessary for growth control.

ACTIVE INGREDIENTS	
2 Ethylhexyl Ester of 2,4 Dichloro-phenoxyacetic Acid (Equivalent to 23.0% 2,4 D Acid)	11.5
2 Ethylhexyl Ester of 2-(2,4 Dichloro-phenoxy) Propionic Acid (Equivalent to 23.0% 2,4 DP Acid)	11.5
INERT INGREDIENTS	77.0
TOTAL	100.0
