

DIRECTIONS FOR USE:

ANNUAL WEEDS:

Apply one gallon of Bochlør 17 (diluted with up to 10 gallons of water) per 150 to 200 square feet when plants are young. Thoroughly wet with a sprayer or sprinkling can all parts of the plant, particularly the growing tips.

PERENNIAL WEEDS:

For the best results treat plants during their dormant stage or when nearing maturity. Good results are obtained with Spring application, but Summer applications are not recommended except as a knockdown treatment. Apply by spraying 1 to 2 gallons of Bochlør 17 per 100 square feet. For deep rooted weeds and grass, such as Johnson, Bindweed, Bermuda and Quack grass the heavier rate is recommended. Re-treatment may be necessary to secure adequate control of certain hard-to-kill weeds.
