

USES

1. General weed control in non-crop areas. Controls broadleaf weeds, brush and grasses. Kills most every type of plant life on contact . . . it kills through the leaves only.
2. General weed control in shrub areas. Chemical will not injure desirable plants as long as spray does not come in contact with leaves of these plants. Chemical becomes inactive on contact with soil; therefore, plant roots do not take up chemical and chemical does not build up and become toxic at a later date.
3. Spot weed control in lawns and other areas — will kill undesirable grasses in lawns if these grasses are spot sprayed.
4. General vegetation control around buildings and other installations, gardens, walkways, patios, storage areas, beneath greenhouse benches, fence lines, golf courses, parkways, driveways, ditches, sand traps and similar areas where any type of vegetation is undesirable.
5. Aquatic weed control. Both surface and subsurface, in ponds, lakes and drainage ditches.

DIRECTIONS

NON-CROP OR NON-PLANTED AREAS: To kill above ground weed growth around buildings and other installations, gardens, walkways, patios, beneath greenhouse benches, fence lines, golf courses, parkways and driveways for control of undesirable broadleaved and grass type weeds— 2½ gals. per 20 gals. water (16 oz. per gal. water). Apply for full coverage and thorough weed contact. Apply preferably to young growth and up to seeding of weeds. Repeat applications necessary to maintain control, particularly on grasses and established weeds. Avoid spray contact with foliage or food crops or ornamental gardens. Do not water treated areas for 24 to 36 hours after application.

WARNING

Do Not Take Internally. Harmful if swallowed. Avoid contact with skin, eyes and clothing. Concentrate may cause skin damage. Use waterproof gloves and face shield or goggles, when handling concentrate. Avoid breathing spray mist. In case of contact, immediately remove clothing and wash thoroughly and get medical attention. For eyes, wash thoroughly with water. Do not store with or near feed and foodstuffs or drinking water. During application avoid drift to adjacent food and forage plantings that might be damaged or the crops thereof rendered unfit for sale, use or consumption. Do not use treated water for human or animal consumption, swimming, spraying or overhead and furrow irrigation within 10 days after treatment. Do not apply to muddy water and do not agitate water excessively with outboard motor or injection equipment during application. Do not feed forage to livestock. Keep livestock out of treated fields. Wash sprayer immediately after application with detergent and water, then rinse with clean water.

This product is toxic to wildlife. Birds and other wildlife in treated areas may be killed. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label

DIBRO-40

A CONTACT, NON-SELECTIVE VEGETATION KILLER FOR THE CONTROL OF BROADLEAF WEEDS, GRASSES AND AQUATIC WEEDS.

ACTIVE INGREDIENTS:

Diquat dibromide (6,7-Dihydrodipyrido)
(1,2-a:2'1'-c) pyrazinedium
dibromide. 1.85%

INERT INGREDIENTS 98.15%

Contains 0.083 lb. Diquat Cation per gal as 0.155 lbs. Salt per gal.
This product is a new herbicidal chemical, when used as directed, will kill most all forms of plant growth without damage to the soil. Absorption and herbicidal action is usually quite rapid with effects visible in a few days. This product is inactivated on contact with soil.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Read entire label. Use strictly in accordance with label cautions, warnings and directions and in conformity with Federal and State Regulations. Wash and destroy container when empty. Never re-use.
