Contents under pressure. Do not puncture. Do not expose container to temperatures above 120 F. Do not throw container into fire or incinerator. Avoid breathing spray mist and avoid contact with skin.

EPA Reg No 11694-52  
EPA Est No 11694-KS 1

### Active Ingredients:

+ (5-Benzyl-3-furyl)methyl- 2,2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate	0.246% w/w
Related compounds	0.034%
Aromatic petroleum hydrocarbons	0.326%
Amyl Acetate	1.000%
Methylene Chloride	11.000%
Tetrachloroethylene	32.000%
1,1,1 Trichloroethane	30.385%
Inert Ingredients:	25.009%
	100.000 w/w

\*Cis/trans isomer ratio max 30% (±) cis and  
min 70% (±) trans

+U.S. Patent No. 3,465,007

### Directions For Use

**For Outdoor Use:** Application should be made in late evening when hornets, wasps and yellow jackets are at rest. Hold can upright. Remove cap. Point valve opening away from face. With wind at back, aim at nests in trees, bushes, under leaves, chimneys, cracks or crevices. Thoroughly saturate nest with spray, contacting as many insects as possible. To prevent insects from falling on skin and clothes, do not stand directly under nest. Best results can be obtained if nest is sprayed in late evening when most insects are at rest. If reinfestation occurs, repeat treatment.

**For Indoor Use:** Point valve opening away from face. Aim directly at hornets, wasps and yellow jackets under rafters, etc. Do not spray in areas where foods and feedstuffs are exposed or handled.

### WARNING

Facilities should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

Remove pets, birds and cover fish aquariums before spraying.
