

Cross-infection is of major housekeeping concern not only in hospitals, but in schools, institutions, and industry. **DC-425** is formulated for this problem area. It both cleans and disinfects effectively and is virucidal when used as directed. Its hard surface disinfecting action will reduce the hazard of cross-infection.

WARNING

Keep out of reach of children. May cause severe eye irritation or eye damage. Causes skin irritation. Do not get in eyes, on skin, or on clothing. Harmful if swallowed. Avoid contamination of food.

Rinse empty container thoroughly with water before discarding or returning drum to drum reconditioner.

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, give milk, raw egg white, gelatin solution; or if these are not available, drink water. Call a physician immediately.

DC-425

Cleaner—Disinfectant—Deodorizer Fungicide—Virucide* for Hospital and Institutional Use

AOAC Phenol Coefficients

Staph. aureus (ATCC No. 6538)	100
Salmonella typhosa (ATCC No. 6539)	43.8

Active Ingredients

Didecyl dimethyl ammonium chloride	4.25%
Tetrasodium ethylenediamine tetraacetate	1.60%
Sodium carbonate	2.00%
Sodium metasilicate, anhydrous	0.50%
Inert Ingredients	91.65%
	100.00%

WARNING

**KEEP OUT OF REACH OF CHILDREN.
SEE LEFT PANEL FOR ADDITIONAL
PRECAUTIONARY STATEMENTS.**

EPA Est. 11694-KS.-1 EPA Reg. No. 11694-75

USE

Add two ounces per gallon. Apply **DC-425** to walls, floors, tables, chairs and benches, and other heavily soiled areas, as well as on floors. At two ounces per gallon against *Pseudomonas aeruginosa*, *Salmonella choleraesuis*, and *Staphylococcus aureus*. Germicidal performance has been confirmed by the AOAC. **DC-425** is shown by its germicidal performance against additional organisms:

Escherichia coli
Klebsiella pneumoniae
Salmonella schottmulleri
Streptococcus faecalis
Shigella dysenteriae
Brevibacterium aerophilum
Enterobacter aerogenes
Proteus mirabilis
Streptococcus pyogenes

* At two ounces per gallon against Herpes Simplex virus (causes infectious mononucleosis and the pox viruses), Influenza virus in respiratory tract, and the London virus in respiratory tract. Fungicidal performance confirmed by the AOAC.

USE DIRECTIONS

Add two ounces per gallon water

Apply **DC-425** to walls, floors and other hard surfaces such as tables, chairs and bed frames with a cloth or mop. For heavily soiled areas, a preliminary cleaning may be required. At two ounces per gallon use-level, **DC-425** is effective against *Pseudomonas aeruginosa*, *Staphylococcus aureus*, *Salmonella choleraesuis*, and *Trichophyton interdigitale*. Germicidal performance against the first three organisms has been confirmed by the AOAC Use-Dilution Test. At 2 ounces per gallon the broad spectrum effectiveness of **DC-425** is shown by its germicidal action against the following additional organisms:

Escherichia coli
Klebsiella pneumoniae
Salmonella schottmuelleri
Streptococcus faecalis
Shigella dysenteriae
Brevibacterium ammoniagenes
Enterobacter aerogenes
Proteus mirabilis
Streptococcus pyogenes

*At two ounces per gallon use-level, **DC-425** is virucidal against Herpes Simplex (a member of the virus family that causes infectious mononucleosis), vaccinia (representative of the pox viruses), and adenovirus Type 5 (a causative virus in respiratory diseases), and Influenza A₂ as represented by the strains commonly called the Hong Kong Flu and the London Flu Virus, on inanimate environmental surfaces.

Fungicidal performance against *T. interdigitale* was determined by the AOAC Fungicidal Test.
