

# SPEER

## Insect Spray

**Kills Flies, Mosquitoes,  
Roaches, Spiders & Wasps**

**CAUTION: KEEP OUT OF REACH OF CHILDREN.**  
See additional precautions on back panel.

**NET WT. 14 OZ.**

**Directions:** Shake well before each use. Remove protective cap. Aim Spray opening away from people. Push button to spray.

**Indoors—For Houseflies, Mosquitoes & Gnats:** Close all doors and windows. Point nozzle upward to direct the spray mist to all parts of the room, especially windows and other light sources which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

**Wasps:** Application should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places contacting as many insects as possible. Repeat as necessary.

**Indoors—For Crawling Insects:** Roaches, earwigs, grain mites, sowbugs, spiders and centipedes. Spray thoroughly into hiding places such as cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators, baseboards and storage areas. Spray directly on insects where possible. Repeat as necessary.

**Ants:** Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

**Outdoors—To Kill Flying Insects:** Control mosquitoes, gnats (midges), houseflies, biting flies and certain flying moths by spraying their resting areas. Follow precautions listed above. Hold container 18 to 24 inches from shrubs, bushes and grassy areas. Spray these areas with a slow sweeping motion at the rate of from 1 to 1 seconds per cubic yard of space while moving away from the treated areas. To reduce annoyance from these flying insects, treat open porches and patios in a similar manner. Spray only when the air is still. Allow spray to dissipate before occupying the treated area. Repeat as necessary.

**Outdoors—To Control Ornamental Plant Pests:** Aphids, exposed thrips, adult whiteflies, leafhoppers, plant bugs, spittlebugs, Japanese beetles, spiders and many a webworm variety. Spray directly on insects by holding the container 12 to 18 inches from the infested plants. Spray in short bursts of one to three seconds over one linear foot of plant foliage. Direct spray to all sides, covering foliage until drips moist. Avoid heavy wetting. Use with caution on the tender foliage of Quince, Japanese Cypress, Mulberry, Ash, Tobacco, Dogwood, Camellia, Azalea, Pyracantha and Camellia, as certain varieties have been found to be very susceptible to damage. Repeat application as necessary.

**Outdoors To Protect Ornamental Plants:** When infested, spray smaller evergreen shrubs, trees and shrubs, including rhododendrons, pines, spruces, hemlocks, yews, arbutus, junipers, holly, dogwoods, boxwood, laurel, etc., with a fine spray of this insecticide. Do not spray Japanese, rhododendron, magnolia, etc., as they are very susceptible to damage. Do not spray on the foliage of apple, and other plants which are susceptible.

**CAUTION: KEEP OUT OF REACH OF CHILDREN.**

Avoid contact with eyes, nose and mouth. Avoid contact with fish bowls. Do not use in children's play areas.

**WARNING:** Do not use in areas where children play. Do not burn. Do not expose to temperatures above 120°F. Never allow container into fire or incinerator.

**ACTIVE INGREDIENTS:**

1,1,1-Trichloro-2,2,2-trifluoroethane	0.250%
1,1,1-Trichloro-2,2,2-trifluoroethane	0.014%
Aromatic polyamide by pyrolysis	0.332%
INERT INGREDIENTS	99.384%
	100.000%

\*Cis/trans isomers ratio: max 30% (±) cis and min 70% (±) trans.
