Gentlemen:

Subject: Deletion of R-11
Spear Flea & Tick Spray
EPA Registration No. 11715-10
Your Submission Dated June 26, 1990

The revised labeling and Confidential Statement of Formula, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, are acceptable provided that you make the labeling change listed below before you release the product for shipment bearing the amended labeling:

- Add the following to the Physical or Chemical Hazards statement:
"Extremely flammable."

Submit five (5) copies of your final printed labeling before you release the product for shipment.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Dennis H. Edwards, Jr.
Product Manager (12)
Insecticide-Rodenticide Branch
Registration Division (H7505C)

To control fleas, ticks and lice: Remove protective cap. Hold can upright. Start spraying at tail, moving spray rapidly and making sure entire pet's body is covered, including the legs and under portions of the body. Ruffle hair while spraying but spray only until tips of hair are moist. Spray directly on ticks. Repeat spraying as necessary but no more than once every seven days.

Spraying a cat 20 to 30 seconds or an average dog 30 to 45 seconds is usually sufficient.

Do not treat or cause exposure to kittens or puppies under four weeks of age. Do not use on pregnant or nursing pets.

To control infestation in sleeping quarters, after treating animals, spray bedding, walls and floor with special attention to cracks and crevices.

Flies, Gnats and Mosquitoes: This product repels flies, gnats and mosquitoes but should not be used as a repellent. Do not spray your animal more than once every seven days.

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
