SHAKE WELL BEFORE USING

TO KILL FLEAS

Hold bottle upright and point nozzle opening in desired direction of spray. Pump the cap up and down with forefinger to create spray. Spray the animal from a distance of 3-12 inches. Start spraying at the tail, moving the dispenser rapidly and making sure that the animal's entire body is covered, including the legs and under the body. While spraying, fluff the hair so the spray will penetrate to the skin. Make sure spray wets thoroughly. Do not spray into eyes, face or scrotum. Repeat as needed.

Apply at a rate of one second per pound of body weight.
