

ACCEPTED

AUG 24 1982

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 10715-107

Directions for Use
General Classification
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

Storage and Disposal
Store in a cool, dry place away from heat or open flame.
Dispose of empty container by puncturing, flattening, and putting in trash container.

This product is not for use on food or food containers. Do not use on food or food containers.

FOR USE ONLY WHEN BUILDING HAS BEEN VACATED BY HUMAN BEINGS AND PETS

Use one canister for each 5,000 cubic feet of unobstructed area. Example: 25' long x 20' wide x 10' high = 5,000 cubic feet. Use additional canisters for remote rooms or where the free flow of the mist is not assured.

PREPARATION: Open cabinets and doors to areas to be treated. Shut off fans and air conditioners. Put out all open flames except pilot light. Remove pets and cover fish tanks or fish bowls with paper or remove from area. Close exterior doors and windows. Cover exposed foods, dishes, and food handling equipment. Remove and dispose of insect-infested food and feed products prior to fogging.

TO START FOGGING: Place fogger on table, chair, or stand at least six feet from pilot light. Place several thicknesses of newspapers under canister to prevent marring of surface. Hold can at arm's length, with top of can pointing away from face and eyes. Push down on finger pad until it locks—this will start fogging action. Set canister in upright position on table, etc., and leave building at once. DO NOT RE-ENTER BUILDING FOR TWO HOURS. Then open exterior doors and windows and allow to air for 30 minutes before reoccupying area.

REPEAT AS NECESSARY

EXPOSED STAGES OF FLEAS, TICKS, ROACHES, SILVER-FISH (NYMPHS AND ADULTS), CRICKETS, FLIES, MOSQUITOES, GNATS, FRUIT FLIES, SMALL FLYING MOTHS, WASPS AND HORNETS.
