PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

May be harmful if swallowed, inhaled or absorbed
through skin. Avoid breathing spray mist and
provide adequate ventilation of area being treated.
Avoid contact with skin, eyes and clothing. In case
of contact immediately flush skin and eyes with
plenty of water. Wash thoroughly with soap and
water after handling. If poisoning occurs, get
prompt medical aid.

STATEMENT OF PRACTICAL TREATMENT

If swallowed - Drink one or two glasses of water
and induce vomiting by touching back of throat with
finger. Do not induce vomiting or give anything by
mouth to an unconscious person. Get medical
attention immediately.

If inhaled - Remove victim to fresh air and apply
respiration if indicated.

If on skin - Wash promptly with soap and water.
Rinse thoroughly.

If in eyes - Rinse eyes with plenty of water and call
a physician immediately.

NOTE TO PHYSICIAN: Chlorpyrifos is a
cholinesterase inhibitor. Treat symptomatically.
Atropine, by injection, is antidote of choice.

Do not use in commercial food processing or
preparation areas. In the home, all food processing
surfaces and utensils should be covered during
treatment or thoroughly washed before use. Cover
exposed food.

Remove pets, birds and cover fish aquariums before
spraying. Do not allow children or pets to contact
treated surface until spray has dried.

PHYSICAL HAZARDS

Do not use or store near heat or open flame.

STORAGE AND DISPOSAL

Storage: Store in a cool dry area away from heat or
open flame.

Disposal: Do not reuse empty container. Wrap
container and put in trash collection.

DIRECTIONS FOR USE SHAKE WELL BEFORE USE

It is a violation of Federal law to this product in a
manner inconsistent with its labeling.

GENERAL: Use Mug-A-Bug Insecticide as a spot
treatment to control cockroaches, waterbugs,
silverfish, ticks, fleas and other insects listed below.
Apply this product as a coarse spray to localized
areas where pests are found or may occur. Spray
surfaces until wet. Repeat as needed.

**To Kill Cockroaches, Ants, Crickets, Silverfish,
Spiders and Sowbugs:** Spray areas where these
pests are found or may hide, including dark corners
of rooms and closets, cracks and crevices in walls;
along baseboards and door and window frames;
behind and beneath sinks, stoves, refrigerators and
cabinets and around garbage cans, plumbing and
other utility installations. Pests driven out of hiding
places should be sprayed directly. For ants, apply to
ant trails, also around doors and windows and
wherever else these pests may find entrance. Repeat
as necessary.

Flies and Mosquitoes: Use only out of doors as an
aid in reducing annoyance from these insects.
Spray outside surfaces of window and door frames
as well as other areas where these pests may enter

the home. Also spray dark corners and localized resting areas (such as under eaves) or porches, patios and garages where these insects may congregate. Flies and mosquitoes coming to rest on treated surfaces will be killed. Repeat treatment when necessary.

Flea and Tick Treatment: Treat all cracks and crevices, such as baseboards and around the bottoms of doors. Spot treat where fleas may be present such as under furniture, under edges of floor coverings, dark corners, and favorite resting spots or other places your pet frequents. Provide a good even treatment, but do not soak the areas you treat. A fine mist or spray applied uniformly is all that is necessary to kill fleas and ticks. Use a registered flea control product on your pets in conjunction with this product. Old bedding of pets should be removed and replaced with clean fresh bedding after treatment of pets.

DO NOT SPRAY PETS WITH THIS PRODUCT.

Humans and pets should avoid contact with treated areas until spray has dried. Avoid spraying furniture and carpeting. Retreat as necessary.

Fleas are best controlled by a total management program. It is suggested that the infested areas be thoroughly vacuumed prior to treatment. The vacuum cleaner bag should be discarded immediately in an outdoor trash container. Continue to discard vacuum cleaner bags until the flea infestation has been brought under control.
