

18 JUN 1992

Mr. T. David Williams, J.D.
Speer Products, Incorporated
4242 B.F. Goodrich Boulevard
P.O. Box 18993
Memphis, TN 38181-1950

Dear Mr. Williams:

Subject: Revised Labeling
Better World Industrial Aerosol Insecticide
EPA Registration Number 11715-130
Submission dated June 9, 1992

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

According to the most recent Confidential Statement of Formula on file with the Agency, the product referenced above contains the compound 1,1,1-trichloroethane. This substance has been designated as a Class I ozone-depleting compound under the Clean Air Act, as amended (refer to CAA sections 602, 610, and 611). This substance is also a List 2 Potentially Toxic Inert Ingredient.

Under CAA sec. 610, the Agency is required to ban non-essential products and uses of ozone-depleting chemicals, in two phases addressing Class I and Class II substances, respectively. In the first phase of the ban, the Agency proposed (57 FR 1992, January 16, 1992) to ban the sale and distribution of all aerosols and pressurized products containing CFCs (fully halogenated chlorofluorocarbons) by November 1992. This proposal is based primarily upon a determination that alternatives are available for all CFC uses in aerosols and pressurized products.

Be advised that before 1994, the Agency expects to issue additional regulations that will likely have the effect of banning or severely limiting the non-essential uses of methyl chloroform (1,1,1-trichloroethane) in pesticide products.

Sincerely,

Richard F. Mountfort
Product Manager 10
Insecticide-Rodenticide Branch
Registration Division (H7505C)

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS
CAUTION**

Harmful if swallowed. Avoid breathing of vapor. Avoid contact with skin and eyes. In case of contact, immediately flush eyes with plenty of water. Wash skin with warm water and soap. Get medical attention if irritation persists. Do not contaminate food or food stuffs. Do not remain in treated areas. Vacate premises for at least 15 minutes after spraying. Ventilate the area after treatment is completed and before re-entering.

Remove pets and birds. Cover fish aquariums before spraying.

Cover or remove all exposed food. In food processing facilities, do not apply when food processing is underway. All benches, shelving, food processing surfaces, and utensils should be covered or removed prior to treatment or thoroughly washed with an effective cleaning compound followed by a potable water rinse prior to use.

In hospitals, remove patients prior to treatment. Ventilate area 2 hours prior to returning patients.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130 F. may cause bursting. Never throw empty container into fire or incinerator.

STATEMENT OF PRACTICAL TREATMENT

If inhaled: Remove victim to fresh air. Apply artificial respiration if indicated.

If on skin or clothing: Remove contaminated clothing. Wash skin with soap and warm water. Get medical attention if irritation persists.

If in eyes: Flush eyes with plenty of water. Obtain medical attention if irritation persists.

If swallowed: Call a physician or Poison Control Center immediately. Do not induce vomiting without medical supervision because of aspiration hazard.
